CLAIM BRAZIL'S CENSUS ROLL IS PADDED 14,500,000

Rio de Janciro, Brazil, Sept. Rio de Janeiro, Brazil, Sept. 16.—The Brazilian government has just issued an official esti-mate placing the country's pop-ulation at 26 million, 542 thous-and souls. Experts here agree-that this is all right up to a-bout 12 million. Beyond that point they say the estimate in-cludes the Indian inhabitants of a vast interior region which of a vast interior region which no white man has ever seen. Consequently they declare that 14,542.000 of the estimate is a

It is wise to consider the weather, as The wheat has been harvested, and It is wise to consider the weather, as well as the condition of the corn, when you are cutting for silage. More peo-ple, we think, cut too early, rather than too late. The rule is to cut when the grains have become dented, and the bottom blades are becoming dry. too late. The rule is to cut when the law out fittle when the capot, and the grains have become dented, and the bottom blades are becoming dry.
After the corn has quit growing it stores up starch and protein during the ripening period, and these elements have great feeding value. Even if the corn becomes quite dry, so that you ave to add water in the silo, it makes excellent silage. In fact, dry corn fodder from the shock or shed has been found to make excellent silage.
It is probably a good plan for the man who has plenty of stock to feed and not much silo room, to save some suitable dry corn fodder for winter filling. On the I. H. C. demonstration farm in South Dakota it is reported that silos thus refilled in January and March made very satisfactory freed. Of course plenty of water must be added as the dry stalks are put in the silo. —Parm Life.
