Crude Oil On Gulls Prevents Them Flying

Puerto Plata, Santo Domingo, Sept. 27.—Crude oil that had been thrown overboard by Uncle Sam's warships to quell the raging waters which destroyed the U. S. S. Memphis during the recent storm, stuck to the wings of sea gulls and other water fowl taking refuge in the bays along the coast, and rendered them helpless and unable to fly for several days.

Members of the United States Marine corps, on expeditionary duty at this place, captured hundreds of the birds with their bag hands.

The oil-begrimed fowl wandered up and down on the beach, crying pitifully, while the marines stood guard to see that boys did not harm them.

RECEIVER OF FALLS CITY MILL IS DISCHARGED

J. Goldsmith, receiver in charge of the defunct Falls City Lumber company at Falls City, has been relieved of his duties as such and the extensive concern has been formally turned over to its successor, the Falls City Lumber & Logging company, in which organization the Cobb-Mitchell interests are predominant. The new company is fast perfecting its arrangements to resume operations, and it is probable that saving will commence early in the ensuing month. The railroad up Teal creek is practically completed, while the improvements at the mill, which have been under way for more than a month, also are about finished. The planing mill has been operated at intervals during the past several months cleaning up the stock on hand for shipment to Salem, and when sawing is resumed it will be with a clean sheet.—Dallas Observer.
