MILK SUPPLY TROUBLES

On top of its street car troubles New York is having a milk famine, caused by the dairymen's league which has a corner on the supply and purposes fixing the price. The peculiar feature of it is that it is the first strike ever recorded among what may be classed as the farmers, and they have adopted the same tactics so often tried by labor, always to its hurt, that is of trying to accomplish their ends by force.

SENATOR LEWIS' GREAT FEAT

Senator James Hamilton Lewis commonly known as "Jim Ham," has come into the limelight politically in a most wonderful manner. It seems but a short time ago since he was the congressman from the state of Washington and a good many of us were disposed to poke fun at him on account of his name and his sorrel color.

The question just now bothering some of the eastern marine folks is whether the much-discussed and long-expected Bremen was born or made twins or triplets. Yesterday it was announced that the French had captured her and so had the English, so there was at least two of her.

Misfortunes never come single for the reason that though that kind of Fortune is prefixed by "Miss" the lady is married and has a large and obstreperous family. It is observed that when she pays a fellow a visit she generally brings the whole family along with the old man with her, and makes her stay indefinite.

WOMAN MAKING GOOD

The emancipation of woman is accomplished, and she is taking her place in all fields. She has always had a free hand in literature, art and music; but outside of these until recently she was barred from practically all other pursuits. Now she has entered all branches and it is well for humanity that she has, for her skill, her inventive genius and her painstaking researches are bearing abundant fruit.

Daily we hear of some discovery due to woman's entrance into science. It was a woman who first separated, as it were discovered the most rare, as well as the most valuable and wonderful of all metals, radium. A page could be easily filled with discoveries due to woman within the past few years, some of them of vast importance. Monday the dispatches told of another achievement of one of these who has been delving deep into chemistry and who has discovered a process for producing liquid rubber that makes the water proofing of any substance possible.

The crop of candidates for city recorder, already large, is like the car shortage, still growing. Petition circulators were busy yesterday and are still so, and the average man looks on it that it is a free for all race and signs up indiscriminately for all applicants although he can vote for but one.

The Southern Pacific has made application to the Public Service Commission for permission to grant the same rates to the Grants Pass sugar factory to Oregon points as are in force from California to the same points. As the haul is less than half the distance the request it would seem should be granted—and then some.

Now if the Phillies or Dodgers would get in and settle that pennant proposition the country might get a chance to turn some thought to the election and Hughes, Wilson and Teddy. The candidates and spell-binders are not getting a fair shake.

Speaking of submarine warfare, isn't shooting a Zeppelin of this class? There is one difference at least and that is that there is no dispute about saving the survivors—from the Zeppelin—there "ain't" any.

The car shortage continues to grow longer instead of shorter like an honest, fair-minded shortage ought to grow.

VACATIONS

"The toiler needs a good vacation, a time of rest and recreation." We hear the sages say; "for work, without an intermission, without a fortnight off for fishin', will make him old and gray." This year I shut down on my labors, and, emulating sportive neighbors, I toured, on pleasure bent; I basked beside some golden fountains, and climbed a bunch of snow-capped mountains, and slumbered in a tent. I thought that, to my work returning, my bosom would with zeal be burning, and I would cut much grass; refreshed by fourteen days of resting, I'd sail into my labors jesting and make things come to pass. Alas, the grind seems twice as dreary, and I am twenty times as weary as when I went away; the task ahead seems harder, bigger, and, wanting all my old time vigor, I sigh, "Alackaday!" I do not care for more vacations; I'll stick to work and earn my rations, if I'm alive next year; of course, they are a thing of beauty, but they unfit a man for duty, and put him out of gear.

Lad Saved Four Lives, Carnegie Fund Asked to Recognize His Heroism

Frank Gorner, Jr., of Marietta, Pa., while swimming in the Susquehanna river the other day, heard cries for help. In an old rowboat he pulled into the swift current of the river and rescued four persons who had been spilled into the water by the upsetting of a canoe. The persons rescued by young Gorner are Miss Hazel Arnold, a trained nurse, William Horner, Douglas Reed and Wm. W. Bruhous, all of York, Pa. Had not young Gorner reached them when he did they would have perished, as they were about exhausted when he arrived. Edgar R. Vilcek proprietor of the Marietta Times, is endeavoring to obtain a Carnegie hero fund medal for young Gorner.

HOW TO ABSORB AN UNLOVELY COMPLEXION

The face which is admired for its beauty must have a satin smooth skin, pink and white and youthful looking. The only thing known that can make such a complexion out of an aged, faded, or discolored one—that is, a natural, not a painted, complexion—is ordinary mercurized wax. This remarkable substance literally absorbs the unsightly particles, a little each day, the clear, healthy, girlish skin beneath gradually peeping out until within a few days it is wholly in evidence. Of course such blemishes as freckles, moth patches, liver spots, blotches and pimples are discarded with the old skin. If you will procure an ounce of mercurized wax at the drug store, use like cold cream every night, washing this off mornings, you'll find it a veritable wonder worker.

Another valuable natural treatment is a wash lotion to remove wrinkles which can be easily prepared. Dissolve an ounce of powdered saxolite in a half pint of witch hazel. Bathe the face in this and you'll find it "works like magic."

About 182,000 acres of the Mndras presidency has been sown in indigo this year, about twice the normal area.

Frank Hitchcock Is Not Field Marshal

Chicago, Oct. 3.—"Stories to the effect that Frank H. Hitchcock is field marshal in the republican campaign and was superseded 'somebody's' more purely imaginary," said A. T. Herr, western campaign manager for Hughes here today, in reply to printed reports that Hitchcock had actually, though not nominally, superseded Chairman William R. Wilcox as manager of the Hughes campaign.

WELCOME HOME

CHAPTER XXXVII. What a welcome I received! How good it seemed to be at home again. Such a fuss as they all made over Edith. I told father that I felt quite neglected now that I had a daughter. I had scarcely unpacked before they commenced making all sorts of plans for my entertainment. All the boys and girls, married or unmarried—Whom I had known from childhood—rushed in to welcome me. Mother gave a dinner dance for me and we danced until daylight. Oh, how good it was to have a good time and no cross looks afterward! Then each in turn did something for me and I almost forgot at times that I was a married woman with a daughter. Every morning after father and I had a canter before breakfast. The colt he had promised baby was now a year old, a lively, frolicsome creature with whom Edith made friends at once. I had written Clifford when I should start south and he had replied in a short note telling me to remain as long as I wished, as their cruise was likely to be an extended one. He sent messages to the family, but I thought a peculiar look came into father's face when I told him of the yachting trip. He asked some questions. I was compelled to tell him there were ladies in the party, and that I had not been invited.
