New York, Oct. 19--The Cunard liner Alaunia, which sailed from New York for Falmouth, October 7, was sunk in the English channel today with a probable loss of 86 members of her crew.

A cablegram to the New York office of the line first announced the sinking of the vessel. Late this evening a cable to the United Press from its London bureau stated that the captain and 163 of the Alaunia's crew had been landed.

The original cable to the Cunard offices merely stated that "some" were missing.

The lumber men are not the only sufferers from the continued air shortage. The farmers are now feeling the effects of the shortage from the fact that commission men and mills cannot obtain cars for shipment of grain out of the state. The hay market is about paralyzed and of course with no cars, wheat or oats are in the same bad fix. Farmers would receive about 10 cents more a bushel for wheat if it could be shipped. As one commission man said, there is no use of taking order for eastern shipment and it is almost impossible to get cars for shipments of hay even to Portland.
