Supercatious people are still living, according to Mrs. Monroe Gilbert. On a table in The Frame Shop she has a little bowl of Chinese "Lucky Dogs." She gave one to a man without a job recently and laughingly told him it was a lucky dog the carrying of which brings luck. He took the dog and in a few days returned and said he had a job. And the dog is a little piece of something or other scarcely bigger than a thumb with a few things painted on it and a thread tied about its neck. Now who says charms do not work.

Here is more good news for the housekeeper. That household necessity known as the standard brands of chewing tobacco such as Star and Horseshoe will continue to be sold at 10 cents a cut. Another piece of cheering news is that rice, one of the most staple articles of food has not advanced and may still be purchased at four pounds for 25 cents. Macaroni, spaghetti and vermicelli and kindred inexpensive articles of food have advanced but a trifle and by skipping a few of the high spots, it has been suggested that the good housekeeper might possibly bring the monthly grocery bill within reasonable distance of the 1915 figures.

Correct any defect in vision and you will at once notice an improvement in school work. You will find that defective vision often affects a child's disposition, creates a condition of lassitude and is many times the cause of those unaccountable "after school" headaches. Have an examination and find the cause of troubles. I use all the modern appliances in making examinations. I use no drugs or drops in making examinations as they are dangerous. Dr. M. P.
