Hawley gave a short talk on the benefits of rural school supervision which he said the county grange had opposed, he believed because the people had not understood. He said that the office costs the tax payers only ten cents on a thousand dollars, while the tax for town and city schools cost \$1.07 on a thousand dollar valuation. Mr. Evans of the O. A. C. addressed the meeting on the subject of county agricultural agent; he said that whenever such agent had been employed they had given satisfaction and had done wonders for the farming industry, by demonstration work and by helping to solve marketing problems.  
Mr. Herber of Yamhill county speaking from experience said that the people would not give him up for twice his salary. There was some discussion on the question and it was finally decided to appoint a committee from the county grange to take the matter up with the county court and advise with them as to the feasibility of acquiring an agent for Polk county. Mr. Gentile stated that the committee previously appointed to select the moments for the training school had not been able to secure just the article desired but would report later. Dr. Matthis of the finance committee made several suggestions as to ways and means of defraying the expenses of the association for the year but nothing definite was decided on. ## Will there be Real Music in Your Home at Christmas?

There is no one so unmusical as to believe that a talking machine produces real music. At best, a talking machine, no matter how much it costs, no matter what artists make records for it, no matter what claims are made for it by its manufacturers, gives only a hollow imitation of the original music.

### The NEW EDISON is not a Talking Machine

This new invention of the world's greatest inventor is in no real sense a talking machine.  
It represents more than two million dollars spent in research work by Mr. Edison.  
It represents the achievement of his ambition to produce a musical instrument which Recreates all forms of music so perfectly that the original cannot be distinguished from the Re-Creation.  
By hundreds of tests, before hundreds of thousands of music lovers, it has been proved conclusively that when an artist sings—or plays—in comparison with the New Edison's Re-Creation of that artist's performance, it is impossible to distinguish the original from the Re-Creation.  
The music critics of more than 200 of America's leading newspapers testify to this fact in the columns of their own papers. We shall be glad to show you what the critics say.

### Hear This New Invention

Come to our store and let us give you a concert of Re-created music. Come at any time. You will always be welcome. There is no obligation to buy. We merely want you to hear what we consider the world's greatest musical instrument.

## GEO. C. WILL

432 STATE STREET SALEM, OREGON

IN OUR great-great-grandfathers' time many New England families had a cask of rum in the cellar.

It was freely offered to guests (except children) and freely partaken of, even as coffee is today.

This old-time custom gradually passed out of existence, for our forefathers recognized it was harmful.

Another old-time custom—coffee drinking—is slowly passing in the same fashion and for the same reason.

The abandonment of coffee drinking is made easy nowadays by the use of *Instant Postum*, the pure cereal beverage with the coffee-like taste.

Unlike coffee, this purely American table drink contains no "caffeine" or other harmful substance.

*Postum* is now used daily in tens of thousands of the best of American homes where reason rules and health is valued.
