The visit to Salem yesterday of two prominent financiers interested in flax indicates pretty well that some of these times there will be several flax mills built either in Salem or some other town in the valley. According to the general views of men interested in flax and the building of mills, it is not a bonus they are after but the assurance that sufficient acreage will be planted in flax to assure enough material to keep a flax mill busy. As a general proposition, there is required an acreage of from three to four thousand in flax to justify the erection of a mill. This is the opinion expressed by men who have been in the city looking into the future of the flax industry.

MAY KILL INDEPENDENT PRESS  
Washington, Jan. 3.—Unless the price of print paper is reduced, "independent papers will be sacrificed while kept papers will prosper," Representative Bailey, Pennsylvania, said today in a statement supporting his resolution for congressional investigation of the news print situation.

"The high price of printpaper," he said, "if continued over a period of years would do more to curb the activities of the independent press in a decade than the interests have been able to do in the last 50 years."
