

Don't wait to put in Ideal heating!

Now that the hardships and fuel-extravagance of last Winter are fresh in your mind, act today by calling up your dealer for estimate on an IDEAL-AMERICAN heating outfit for your building. Decide to put it in now! Heating contractors can do best work now, when rush season is not full on.

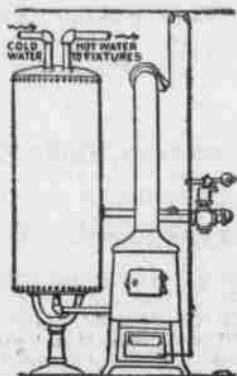

"Here's where we change another house into a HOME!"

AMERICAN & IDEAL RADIATORS & BOILERS

IDEAL Fitters now have all piping and fittings cut to size and assembled at shop. Hence when IDEAL Boiler and AMERICAN Radiators are delivered at door, it's a matter of few days only before outfit is giving out heat aplenty. No noise or disturbance to building or occupants.

Automatic heat regulation for mild weather

THE IDEAL SYLPHON HEAT REGULATOR automatically controls draft and check dampers of IDEAL Boiler—responding to slightest weather change. In mild weather this regulation quickens only enough fire to "take off evening or early morning chill," with little coal burned; great economy comes from not burning fuel needlessly.

Our IDEAL Hot Water Supply Boilers will supply plenty of warm water for both kitchen and laundry at cost of few dollars for fuel for season. Temperature just right, kept so by IDEAL Sylphon Regulator—fire never goes out!

IDEAL heating reduces living costs!

If you would get the most from your input of coal in outcome of genuine comfort, with lowest up-keep expense—warding off an avalanche of heating troubles for all winters to come—write us today for book (free): "Ideal Heating." Inquiry imposes no obligation to buy—glad to give you full, valuable information free. Phone, call, or write us today.

Arco Wand sold through dealers on easy terms of payment

Installed in any new or old building without tearing up anything. Now also made in two-sweeper size for apartments, hotels, office buildings, etc. Lasts for years—always ready for most thorough cleaning. Fully guaranteed, in sizes at \$175 up. Sold on Easy Payment Plan. Send for catalog and know why the ARCO WAND Vacuum Cleaner is best to buy.

MUNITIONS PLANT (Continued from page one)

refused admission of frenzied relatives and friends to the morgue. The horror was the more heart gripping since most of the victims were women.

Explosion at 7:30.

Philadelphia, April 10.—Eddystone police headquarters at 1 o'clock this afternoon estimated that at least fifty persons, many of them girls, were killed and probably 200 injured, when a series of mysterious explosions destroyed the main section of the Baldwin Locomotive munitions works shortly after 10 o'clock today.

Nine buildings in section P, with machinery worth millions of dollars,

were completely shattered by the terrific shocks, which shook this city like an earthquake. Practically every building in the entire plant was damaged. The origin of the explosions is being investigated this afternoon by a detachment of expert agents sent to the scene by the local branch of the department of justice. The government agents are proceeding on the theory that the explosions were not accidental.

Detectives from this city joined with officials of the company in running down numerous clues to the origin of the explosions. One report, which is not verified, said that a man who was under suspicion was shot when he tried to escape from the scene. Great secrecy however, involved the activity of the officials and details were refused.

Ground Torn Up

The ground near the plant was so badly torn up that ambulances could not approach. A heavy pall of smoke hung over the whole district and intermittent explosions were still occurring after one o'clock this afternoon.

A report received at Chester, stated that not less than fifty men had been killed and estimated the seriously injured at two hundred. The report came direct from the scene but it was admitted that confusion still made the figures uncertain.

About 750 men were employed in the shrapnel factory where the first explosion occurred.

The cadet battalion of Pennsylvania military college at Chester under command of Captain Louis S. Morsey, Tenth United States cavalry, arrived on the scene this afternoon and immediately took up guard duty about the plant at the request of Eddystone authorities. The boys were armed with rifles.

Captain Walter Wilhelm, manager and vice president of the Eddystone plant, this afternoon said:

"All departments of the Eddystone Ammunition Works will resume operations tomorrow morning with the exception of the box, packing and base charging departments. All departments including these will resume work on April 24."

Continuous Explosions

Philadelphia, April 10.—Early reports, following three terrific explosions in the Baldwin Locomotive Munitions factory at Eddystone today gave estimates of the casualties ranging from ten to fifty dead and from 100 to 200 injured. In the excitement and confusion following the explosions, which occurred shortly after 10 o'clock it was utterly impossible to get definite facts as to the number killed or

hurt, or the full extent of the damage. One report from the fire department headquarters at Eddystone stated that more than one hundred men had been sent to the hospital at Chester and that many of them were believed to be so critically injured that they could not recover.

Reports direct from the scene said that many must have been killed outright.

The nearby buildings were literally shattered to pieces by the force of the three successive shocks.

Fire departments were called from nearby towns to fight the blazes which sprang up immediately after the explosions.

After the three big shocks, minor explosions continued intermittently and at times sounded like the firing of a gatling gun battery. For this reason it was impossible for rescuers to approach near to the actual scenes of the explosions. Many ambulances with doctors and nurses from Chester and other points were arriving at Eddystone at eleven o'clock.

Wheat Market Nervous Prices Fluctuating

Chicago, April 10.—May wheat opened from 2.05 3/5 to 2.06 1/2 today and sold off to \$2.02, a decrease of 13 cents from yesterday's high point. Later all futures except September advanced sharply. All the speculative markets on the board of trade were demoralized. Longs were discouraged by the general talk of federal control. The short interest was small. May opened down half, later gaining half to \$2.07. July opened down, 2, later regaining 1-8, going to \$1.84 1-8. September opened down 3-4 and later declined 1-4 to \$1.69 3-4.

Conditions in corn were much the same as in wheat at the opening. Upon the display of strength in hogs the market more than regained early losses. May corn opened down 2, later gaining 2 1-8, to \$1.28 1-8. July opened down 2 and subsequently advanced 2 1-8 to \$1.27 1-8. September opened down

BALL GROUNDS EAST COVERED WITH SNOW

Everything Ready for Opening Season Except Weather and Fields

By H. C. Hamilton. (United Press staff correspondent.) New York, April 10.—Everything except the weather is set today for the opening of the major league baseball season tomorrow. As for the weather—it's best not to interview any baseball magnate on that subject.

Some very, very cold snow was doing the honors today at Ebbets Field and the Polo Grounds in New York, and at Braves Field in Boston. Conditions were little better in Philadelphia.

President Tener of the National league today announced his umpire assignments for the opening series and then sat right quiet to see if his luck is good. O'Day and Brantfield are scheduled for Brooklyn; Byron and Quigley at Boston; Klein and Emslie at Chicago; Ripier and Orth at Cincinnati.

The weather in these parts is a serious menace to opening the season. Unless it turns warmer it will be impossible to play baseball.

Cadlock Bested Stecher.

Omaha, Neb., April 10.—Earl Cadlock made good his own and Frank Gotch's boast that he would bring the championship back to Iowa when he made Joe Stecher, the Dodge county, Nebraska, farmer quit after three hours of fierce wrestling here last night.

Stecher won the first fall in one hour and twenty-two minutes but only after a fall through the ropes left Earl in a dazed condition. Cadlock came back strong in the second fall and had things all his own way thereafter. He really threw Stecher twice, but the referee refused to grant the first one because the men were partly off the mat. The time in the second fall was one hour and forty minutes, and after the usual 15 minute intermission it was announced that Stecher would not come back to continue the match and it was given to Cadlock.

Tennis Star Goes East.

San Francisco, April 10.—One more of California's tennis stars is to become an easterner. He is Peck Griffin, holder with William Johnston of the national double championship. He is going into the brokerage business in New York. It is understood he will pair with George M. Church in doubles hereafter.

Cubs Get Blackburn.

Boston, Mass., April 10.—Earl Blackburn, Braves catcher, today became a member of the Chicago Cubs. He was sold when the Cubs refused waivers. Blackburn came to the Boston team from the Indianapolis club.

Drew to Have Chance.

New York, April 10.—Howard Drew, negro sprinter, has arrived here to take part in an athletic meet, in an attempt to come back.

CAFETERIA PROVING GREAT CONVENIENCE

While Prices Have Been Low Profit On Operation Is Shown

The cafeteria business in the high school and the three junior high schools is not only proving to be a great accommodation to the pupils, but they are now being run at a profit. The object of the cafeteria was not to make money, but to serve all foods as low as possible and yet pay expenses.

According to the reports filed at the meeting of the board of education last evening, the receipts of the high school cafeteria for last month were \$119.85 and the expenditures \$112.85. For the year the expenses were \$639.60, expenditures \$636.31, leaving a balance of \$3.29. Evidence that the food was served to the students at about cost.

The Washington junior high school reports for its cafeteria for last month receipts \$86.13 with expenditures of \$71.52. The Lincoln junior high school reports receipts of \$74.52 for March with an outlay of \$70.13. The Grant junior high school served meals at about cost during March as the expense of doing business was \$57.70 and the receipts \$58.74.

TO INCREASE RATES

Washington, April 10.—Immediate increases in the general freight rates are being prepared today as a result of a special conference between the interstate commerce commission and representatives of the railroads of the country, called to consider urgent needs of the railroads for additional revenue on account of the war.

Portland investors are ready to go the limit in helping to finance the war. Every bank and every bondholder in town is getting scores of inquiries every day from residents who want to buy war bonds.

It Works! Try It Tells how to loosen a sore, tender corn so it lifts out without pain.

Good news spreads rapidly and drug gists here are kept busy dispensing freezone, the other discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers. Ask at any pharmacy for a quarter ounce of freezone, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus. You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue. This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

Why We are Enthusiastic About the

EDUCATOR SHOE

BECAUSE wearing Educators is the next thing to going barefooted. Their correct broad-toed shape allows Nature to relieve—perhaps entirely free—your feet from the troubles caused by narrow, unnatural shoes.

For all bent bones, corns, bunions, ingrowing nails, flat-foot, etc., come from the pinching pressure of wrongly-shaped shoes.

Educators will save your children from ever having such troubles. Get the whole family into Educators today.

EDUCATOR branded on the sole guarantees the orthopaedically correct Educator shoe that "lets the feet grow as they should." Made only by Rice & Hutchins, Inc., 15 High St., Boston, Mass.

State News In Brief

The Third Oregon is now recruited up to full war strength, 2,050 men.

Mrs. J. Camp, and her sisters, Misses Amelia and Alma Saunders, all of Madras, were all operated on for appendicitis at a Eugene hospital, within four days.

The Rev. Charles E. Joy, pastor of the First Unitarian church at Portland, was buried in effigy in front of his church Monday night by a party of unknown men, after he had preached a sermon in which it is alleged he said: "The war in which we serve is an unrighteous war."

McMinnville high school furnished 31 recruits for the Third. This out of an enrollment of 200.

Gold Hill placer miners are anticipating an unusually good season on account of the heavy snow and consequent abundant supply of water.

Seventy-six men enlisted at Eugene for service in some branch of the United States army or navy during the week beginning April 2 and including Monday, April 9. The second company, Coast Artillery Corps, leads the roll with 29 men. The regular army is next with 24 men.

A wedding set for June was solemnized in Lebanon Sunday afternoon at the home of the parents of the bride, when Miss Leola Hiyen and Leonard Vaughan were united in marriage by Dr. C. H. Young, of Albany.

In response to an appeal by the Eugene Chamber of Commerce more than 150 boys have applied for permission to cultivate vacant lots. The chamber is loaning the children funds to get the lots prepared for planting.

Mrs. Elizabeth King fell from a second floor window in the Saunde rooming house in Portland last night to the

For fourteen years Dr. Kilmer's Swamp-Root has stood the test in my trade and today is equal to the best remedy for kidney, liver and bladder ailments. It enjoys a splendid reputation and has met with great success according to the favorable reports received from my customers who have used it in the troubles for which it is intended. I know of a case of gall stones that was entirely cured through its use and I firmly believe in its merits.

Very truly yours, LYNN B. FERGUSON, Druggist, Newberg, Oregon.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will do for You

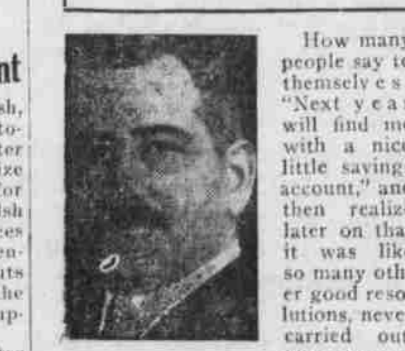

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Salem Daily Capital Journal. Regular fifty cent and one dollar size bottles for sale at all drug stores.

street, while engaged in a friendly scuffle with her husband. She fell on her side, breaking an arm and a leg.

LITTLE TALKS ON THRIFT

By S. W. STRAUS, President American Society for Thrift

How many people say to themselves, "Next year will find me with a nice little savings account," and then realize later on that it was like so many other good resolutions, never carried out. The time to begin is now, nothing is ever gained by indecision. Begin by doing without some one thing, which possibly may not come under the head of extravagance, and still is not a necessity. It is not so much the amount you save at first that counts, but it paves the way for the systematic saving, which, in the end, makes the successful men and women of tomorrow.

Secretary Redfield of the Department of Commerce, has sent appeals to the public schools throughout the country, asking the children to save old paper and rags. "In the early history of the paper industry," he says, "publicity was given to the importance of saving rags. It is of scarcely less importance now." If the children would begin by saving these two things, it would be a great step in the right direction. We should teach them it is not a thing to be ashamed of, as some of our largest industries make their profits from by-products.

Andrew Carnegie, who for years yielded an influence in the industrial world as great, perhaps, as any living man, came to this country practically penniless when he was twelve years old. His phenomenal rise in life may be attributed to his following clear principles and methods. In an address to students in a commercial college he said, "Avoid speculation; avoid indentments. Aim high. For the question 'What must I do for my employer?' substitute 'What can I do?' Begin to save early—Capitalists trust the saving young man. Concentrate your energy, thought and capital; fight it out on one line."
