Breathing a Health Asset, Pulmonary Diseases Preventible

The Y. M. C. A. Chautauqua Health lectures at the First Methodist church today and tomorrow will deal with the most vital problems of health, confronting the American people. The subject of J. C. Elliott this afternoon was "Scientific Breathing for Health." The subject tonight at 8 o'clock will be "The Dangers of and Abnormal Food Supply." Wednesday, 7:30 p. m., Mr. Elliott will deliver what he considers the most valuable single lecture of the entire course, on "Cause and Cure of Colds, Catarrh, Pneumonia, and Tuberculosis." This is usually the one paid lecture of the course. When a paid

lecture the price of admission is one dollar. This regular paid lecture will be given here for a silver offering. This lecture has packed to the doors the largest auditoriums. At Long Beach hundreds were turned away unable to gain admission. Three hundred people stood up outside the large tent, or sat on the ground or improvised seats during the entire time of the lecture. The capacity of the tent was doubled in San Diego, and still hundreds were turned away. The great auditorium of the Christian church was packed in Eugene to hear this lecture on "Pulmonary Diseases or the Great White Plague." Pulmonary Diseases Preventible. Our nation is just awakening to the fact that pulmonary diseases are preventable. The scientists, the physician, and the anti-tuberculosis league have reduced the death rate from tuberculosis 25 per cent in the last 10 years.

No child can inherit tuberculosis of the lungs. Both parents may have died with tuberculosis, yet the lungs of the child may be developed so that they will be immune from the assaults of tubercular germs. Prevention of pulmonary diseases is practical in all climates. Oxygen starvation is the chief cause of a half million deaths annually in our nation from pulmonary diseases. There are 725,000,000 air cells in the lungs. Millions of these cells are undeveloped and never inflated with oxygen. The flat cell is a diseased cell. It forms a breeding ground for the tuberculosis germ, and the whole lung is attacked from this single base. As well permit a naval base for German submarines in the Gulf of Mexico and expect protection for the nation, as to permit millions of undeveloped lung cells, as a breeding ground for tuberculosis germs, and expect to prevent pulmonary diseases.

Lung Capacity Imperative.
The development of lung capacity is imperative. Many have a lung capacity of less than 150 cubic inches. From 250 to 300 cubic inches is imperative for health. This development of lung capacity should begin in the child. The demands for our body for oxygen are more vital than the demands for food. We can live weeks without food, days without water, but only moments without oxygen. Breathing exercises should be compulsory in our public schools for the nation. The development of strong bodies is far more important than the development of keen intellects. The keenest intellect is handicapped by disease and a weak body. Body building should be the primary principle of all education. Thousands graduate with highest honors and with intellect trained until it is as keen as a Damascus blade, but are forced to spend their lives nursing their diseased bodies. No child should be allowed to reach 12 years of age without a chest expansion of four inches. This should be five and a half before they reach 15 years.

Auburn News
(Capital Journal Special Service.)
Auburn, Ore., April 10.—The Auburn Literary society gave a program last Friday evening that was gotten up by the boys. The following program was given: Debate, "Resolved, That military training should be universal in the United States." The members of the affirmative side were Roy Sneed and Gail Williams. On the negative side were Late Savage and Frank Haynes. The judges were Mr. Tucker, Mr. I. McElfresh and Mr. J. Mathis. They decided unanimously in favor of the negative side. Music by the Kainers band, directed by Roy Mathis. Music by Late Savage. Recitation, Roy Sneed, Male quartette. A cornet solo, by Roy Sneed. "Auburn Digest," edited by Mr. Frank Haynes.
Mr. Mathey has recovered from a recent illness.
Mr. and Mrs. Chas. Lindquist, of Silverton, were visitors at N. P. Olson's Sunday.
Mrs. C. M. Terry spent Sunday and Monday under the parental roof.
Mr. Fugg is working in Fruitland now-a-days.
The last woman's missionary meeting met with Mrs. Bushnell. The following ladies were present: Mrs. Peables, Mrs. Hamner, Mrs. Mathey, Mrs. Olson, Mrs. Sutter, Mrs. Sneed, Misses Mable Williams and Lucille Latimer.
The Sunday school gave a fine Easter program Sunday to a full house of interested listeners. The school house was profusely decorated with yellow daffodils and greens. The program was well rendered, some of the numbers given are: Recitation, by Mrs. Sneed. A march drill by the little folks, under the direction of Miss Mable Williams. Quartet, by Mrs. A. Williams, Miss Mable Williams, Mr. Gille and Mr. Whipple. Recitation, by Margaret Proe. Recitation, by Georgia Sneed. Reading, by Anna Fagg. Cornet solo, by Roy Sneed. Song, by the young men and young women's classes. Male quartet, by Mr. Proe, Leo Sutter, Gail Williams and Roy Sneed. At the close of the program a collection was taken up for the benefit of foreign missions.
Ralph Olson, of Turner, spent the week-end with the folks at home.

GUARANTEED TO REMOVE SUPERFLUOUS HAIR ROOTS
(Wonderful New Method)

Glorious news for women troubled with disgusting hairy growth. By means of an entirely new and very simple method you can now remove not only the surface hair, but the roots as well! Just get a stick of phaeoline from your druggist, follow the easy instructions—see the hair roots come out before your very eyes! Yes, you can hardly believe your eyes, the work is done so quickly, completely, harmless!

Phaeoline is non-odorous, non-poisonous—couldn't hurt a child to eat it. So effective that satisfaction is guaranteed—money back if you want it.

ASK ALEXANDER 'The Man Who Knows'

Albany held a great patriotic rally last night, 3500 taking part. Justice Harris of the supreme court was the principal speaker.

PRIZE FARM IN ALBERTA BREAKS WORLD'S RECORD FOR WHEAT

THRESHING WORLD'S RECORD WHEAT CROP AT NOBLE FORD

The world's record for large acreage has been broken in fertile Alberta by C. S. Noble, an American. The mammoth crop from 1,000 acres has been reaped, threshed and marketed, and now the details are being entered according to a cost system like that of a great factory.

Recently the last load of grain, hauled by a team of prize Clydesdales, arrived at the elevators at Lethbridge, completing a total of 54,383 bushels from 1,000 acres. Behind it was a procession of autos

filled with member of the local board of trade.

The story of "How I Did It" includes the use of the most modern business methods. Telephones at a central office were used for personalizing operations which covered 120 square miles and required 120 men.

When Noble's presence was required at any place he had a high-powered automobile at his door which whirled him there at high speed.

RICHARD OLNEY DEAD
Boston, Mass., April 9.—Richard Olney, secretary of state during the Cleveland administration, died at his home, 56 Fenway, last night, it was learned today. He had been ill for some months.

Olney was 82 years of age and had been in poor health for the last four years. President Wilson offered him the ambassadorship to Great Britain at the beginning of his administration, but Olney declined on account of his advanced age and resisted all pleadings. He likewise refused the president's proffer of the governorship of the federal reserve board.

Thanking the King States America's Case

Lincoln, April 9.—Thanks to King George for his "inspiring words" in greeting America's entry into the war expressed by President Wilson in the following message received by the King today.

"Your eloquent message comes to me at this critical moment in our national life as proof of a community of sentiment among the free peoples of the world, now striving to defend their ideals, maintain the blessings of national independence and uphold the

THEY WERE ROUNDED UP

How often we hear it said of a man or woman that "they were rounded up in health" which accounts for their present sickness. For that reason it is important that when you find you tire easily, when your nerves are troublesome or your work is irksome, you should strengthen your system immediately with the blood-enriching, tissue-building food in Scott's Emulsion which contains pure Norwegian cod liver oil and is free from alcohol.

GREAT SMASH IS
(Continued from page one.)

Blows have cracked the steel of the German line around Arras and his wedge seemed likely to split the enemy front still further apart.

Actually the British are operating over a front of close to 50 miles. It was on a section of nearly 15 miles frontage that Haig yesterday struck his mightiest blow.

Not only was the taking of Vimy ridge hailed here with satisfaction on sentimental grounds, but it was pointed out that domination here destroys all hope of the Germans' favorite plan of nut cracker tactics—Vimy ridge being the swivelled junction point of the two pincer-like arms heretofore forced north and south by the Teutons. Moreover Vimy commands the rich coal and industrial section of France. With this position in British hands the Teutons' grip on the section is immediately menaced. And Germany desperately needs the coal and metal there.

A little further penetration of the German line on this 12 mile front and the Germans will be in grave danger of having their flank turned. Indeed front dispatches today carried rumors of a vast plan of retirement by the Teutons, indicated in wholesale burning of villages from Lille to around Verdun. The Germans must keep their line straight. "Kinks" are dangerous when those twists are tied by the tremendous drive of the British offensive. They strain the whole line and the Germans evidently realize that with the great resources in men and metal shown by Haig, a penetration to any distance would open a gap that would be fatal to their whole line.

Berlin Admits Loss.
Berlin, via London, April 10.—"The English, after several days activity, yesterday morning, attacked us and succeeded, as a result of hard fighting, in penetrating our positions on roads radiating from Arras," declared today's official statement. "They did not succeed in breaking through."
"Southeast of Ypres," the statement said, "we penetrated beyond the third English defense lines, blew up shelters and brought back 50 prisoners and sev-

OLD FOLKS NEED "CASCARETS" FOR LIVER, BOWELS

Salts, Calomel, Pills Act On Bowels Like Pepper Acts In Nostrils

Enjoy Life! Don't Stay Bilious, Sick, Headachy and Constipated

Get a 10-cent box now.

Most old people must give to the bowels some regular help, else they suffer from constipation. The condition is perfectly natural. It is just as natural as it is for old people to walk slowly. For age is never so active as youth. The muscles are less elastic. And the bowels are muscle.

So all old people need Cascarets. One might as well refuse to aid weak eyes with glasses as to neglect this gentle aid to weak bowels. The bowels must be kept active. This is important at all ages, but never so much as at fifty.

Age is not a time for harsh physics. Youth may occasionally whip the bowels into activity. But a lash can't be used every day. What the bowels of the old need is a gentle and natural tonic. One that can be constantly used without harm. The only such tonic is Cascarets, and they cost only 10 cents per box at any drug store. They work while you sleep.
