ACCURACY in the science of optometry is quite as important as in mathematics, and skill and good judgment are as essential as in the practice of medicine.
THOROUGH TRAINING and long experience alone can assure these. The necessary equipment must also be complete.
THE SUCCESS of the work I do is evidenced by over sixteen thousand persons in Marion and Polk counties whose eyes I have examined and the commendation of most of the physicians of the city and county who do not do such work, who direct to me for examination patients whose complaints suggest possible eye strain.
EXPERIENCE of thirty-four years is behind my system.
GLASSES are exchanged for one year when necessary WITHOUT ADDITIONAL CHARGE, to make sure that the best results possible have been obtained. When still further improvement can be made--due to the relief of the previously strained muscles or for any other reason--changes are also made without charge.
