

The Real Greatness of the Maxwell Is in Its Perfected Mechanism

Mechanical perfection has made the Maxwell endurance champion of the world—the most economical car to run—a source of complete satisfaction to 200,000 Maxwell Owners.

Let's consider the Maxwell first as a piece of machinery, —for that's what a real automobile is—a machine.

Fancy upholstery, enamel, a highly polished instrument board are excellent things, —but they don't make a great motor car.

Motor-car merit depends, first, last and always, on mechanical construction, —on the parts that are hidden from your view.

The Maxwell has grace of form and line—travels easily— is roomy and comfortable, —a novice knows that—it's obvious.

But, let us pick the car to pieces and see what you actually get for your money.

The Sturdy, Masterful Chassis

In the first place, there is one—and only one—Maxwell chassis, —and that chassis not an experiment, —not the whim of some designer who craves a reputation —be different or original.

Nobody is permitted to tinker with that one Maxwell model, —no smart ideas are allowed to swerve it from its course —development, refinement, perfection along the known, proved, —age-tried principles of automobile construction.

The Maxwell Engine is the Embodiment of Efficiency and Power

The Maxwell engine is the concrete manifestation of efficiency and power brought up to an almost unbelievable point of perfection.

It has much of the velvety smoothness characteristic of the motors in high-priced cars, —plus power, economy, reliability and simplicity.

This marvelous motor is daily taking Maxwells over tens of thousands of miles of the hardest sort of going at an average cost of only \$6 to \$8 a month.

One of these Maxwell engines—just like the one your Maxwell will have—went for 44 days and nights without stopping, carrying a Maxwell over all kinds of roads, in all kinds of weather, at a rate of 25 miles an hour, on 22 miles per gallon of gasoline.

Some Other Mechanical Factors That Make the Maxwell Great

The Maxwell axles stand up like the foundations of a mighty skyscraper, —they are designed, forged, heat-treated and built complete in our own factories.

The Maxwell transmission—noiseless, self-lubricating, trouble-proof—is the height of mechanical sanity and safety.

The marvelous Maxwell clutch—running in oil, simple, smooth, wear-proof—has an efficiency greater than that of any other car, no matter how high-priced.

Besides—each part of the Maxwell chassis is made of only the finest metal that can be procured, —and then only after the material has been subjected to the most rigid tests known to science.

Buy the Car That Stands the Test

Don't buy a car on looks, but find out just what is inside it —if the vital parts of the car are mechanically right.

The more you study the Maxwell the more certain you will be, as we are, that the Maxwell is the world's greatest motor car value.

Come to our sales rooms and let us prove to you that the Maxwell is mechanically right.

Roadster, \$650; Touring Car, \$665; Cabriolet, \$865; Town Car, \$915; Sedan, \$985; completely equipped, including electric starter and lights. All prices f. o. b. Detroit.

Selling at \$3.13 17 Cents Since Close

May 9.—Following yesterday's favorable government grain market futures moved to record today. May wheat opened 2 1/2 bushels this morning and advanced 2 to \$3.13 per bushel.

July opened up 9 1/2 and later gained 1/2, going to \$2.48. September opened up 7 1/2 and later advanced 7 cents to \$2.08. Flour went up 40 cents a barrel to \$16.00.

Corn followed the advance in wheat but the influence was slight. May opened up 1 1/2, later advancing an additional 1 1/2 to \$1.59 1/2. July opened up 3 and subsequently gained 1/4, going to \$1.48 1/2. September opened up 2 1/2 and

later gained 5-8 to \$1.39 3-4.

Oats opened higher but declined slightly. May opened up 1 1/4, subsequently declining 1/4, going to 69 1/2. July opened up 2 3-8, later losing 1/4 to 65 1/2. September opened up 1 5-8 and later declined 1-8 to 56 3-8.

Provisions, following the advance in hogs, showed slight gains.

\$1,800,000,000 to Be Raised Under Bill Introduced

(Continued from page one.)

The remainder will be provided when wanted later, Wilson was told by leaders of both parties.

The shipping board is understood to have made a complete survey of all ships for sale in the United States. If owners of these ships show any hesitancy in selling, should the government want the ships, means will be found to bring such owners to terms. The means may be through the bill pending which would give the president power to commandeer all shipping.

To insure prompt and efficient handling of all supplies in carrying out the government ship building program, the shipping board today created the office of director of traffic of the board and the emergency fleet corporation.

Major General George W. Goethals, general manager of the corporation and William Denman, chairman of the board announced the appointment of David L. Ewing of St. Louis to the new office.

LAW CLASS FOR WOMEN

Engene, Ore., May 8.—A law class for women is an idea which Dean E. W. Hope, of the University of Oregon law school, is considering today. He has not yet decided whether he will establish such a course, but will if he is convinced there is sufficient demand. The class would take up legal matters in

W. U. Faculty Selects Three Students for Albert Prize

Raymond Attebery, Mabel Garrett and Victor Collins were today announced by President Doney as the candidates nominated by the faculty for the Albert Prize.

By a series of complicated balloting the faculty in meeting yesterday succeeded in eliminating all of the students but the three named. The conditions of the award are: The faculty 30 days before commencement shall nominate three students for the honor and two weeks later the student body shall select one of the three by secret ballot. The award shall not be made to the same person more than once.

It is desired to select the student who, during the school year, opportunities considered, has made the greatest progress toward the ideal in character, service, and wholesome influence. Miss Garrett and Mr. Attebery are juniors, while Mr. Collins is a freshman.

which women have particular interest, such as marriage and divorce, guardianships, and parent and child.

COUNT HERTLING MAY GET HOLLWEG'S PLACE

Opposition Getting Together for Fresh Attack, Due to Speech Postponement

London, May 9.—Presence in Berlin today of the Bavarian premier, Count Hertling, has revived rumors in Germany that he is to succeed Von Bethman-Hollweg as imperial chancellor, according to dispatches received via Holland.

From Zurich it was reported that Hollweg had already tendered his resignation, but there was no confirmation of such a rumor.

Count Hertling is ostensibly in Berlin to preside at the meeting of the foreign affairs committee of the federal council.

All Holland dispatches today emphasized the existence of a serious internal political crisis in Germany. For weeks it has been apparent that sentiment against Hollweg among his political opponents was slowly crystallizing. Heretofore the chancellor has succeeded in weathering all opposition because of the inability of the opposing political parties to get together on any concerted plan of forcing his retirement.

Today German newspapers indicated a fresh attack on Hollweg likely to afford ground for such concert of action, in dissatisfaction over repeated postponement of the chancellor's much advertised speech outlining Germany's war aims.

BRINGS STATE BANKS IN

Washington, May 9.—The senate this afternoon passed the administration bill amending the federal reserve act so as to draw state banks into the federal reserve system and strengthen the system's gold reserve by approximately \$200,000,000.

PERSONALLY CONDUCTED TOUR AND JUNGLE NURSERY BIG EDUCATIONAL FEATURES OF AL. G. BARNES' CIRCUS

No more little white lies. No more circus hokey days. Such childish temptations are taken away since educational heads have learned that a way has been provided to give their pupils an opportunity to get a greater learning in a day from their usual studies by spending it at the big animal circus. Instead of being compelled with unhappy hearts and disturbed minds to "crum" over books whose pages were blurred with visions of pink lemonade, performing elephants and pretty girls all "dotted" up in spangles and fine silks; whose ears hear only the sound of the roaring lions and the beloved bark of the zany hoo calling out the wonders of the billowing canvas heaven, their childish hearts are made happy and their education enlarged by a personally conducted trip through the immense jungland of Barnes' circus.

Last season Al. G. Barnes instituted in his big wild animal circus a "personally conducted tour" of the animal tents, especially for teachers and children patronizing the circus in the afternoon, and as a consequence city after city along the Barnes route gave full days from their regular studies that those who could might take advantage of this rare opportunity. This year Mr. Barnes has added several new animals to his already immense aggregation, many new acts are presented and everything newly painted and decorated. A more concise arrangement for the "personally conducted tour" has been formed and a jungle nursery established.

Those desiring to take advantage of the personally conducted trip are requested to be at the entrance of the main tent promptly at 1 p. m. Teachers, children and their escorts will be segregated and entered first. Once in-

side the animal tent, the party will be taken in charge by a competent lecturer and attendants, among them a woman to look after the comforts of the girls, men doing the same for the boys. Each and every den of animals will be visited, the lecturer speaking through a megaphone will explain where each and every specie of animal comes from, and how educated to do every kind of circus trick. The tour will end at the jungle nursery, where a whole colony of baby animals and their mamma's disport themselves for the edification of the kiddies. Later on the party are taken into the main tent to a special block of seats set aside for them, either in the general or reserved section, as their tickets call for. Attendees are placed near to enter to their needs and see that none stray away. There is a big spectacular pageant opening the program of 65 acts, presented by over 3,000 animals, 150 animal educators and 500 attendants.

The J. B. Miller logging road, between Toledo and Siletz, which has been in the hands of a receiver for the past several months, has been reorganized, the claims against the road adjusted and the receiver discharged.

CORNS HURT TODAY?

Lift your corns or calluses off with fingers and it won't pain you one bit.

Yes! You truly can lift off every hard corn, soft corn or corn between the toes, as well as hardened calluses on bottom of feet without one bit of pain.

A genius in Cincinnati discovered freezone. It is an ether compound and tiny bottles of this magic fluid can now be had at any drug store for a few cents.

Apply several drops of this freezone upon a tender, itching corn or callus. Instantly all soreness disappears and shortly you will find the corn or callus so shriveled and loose that you life it off with the fingers. You feel no pain while applying freezone or afterwards.

Just think! No more corns or calluses to torture you and they go without causing one twinge of pain or soreness. You will call freezone the magic drug and it really is. Genuine freezone has a yellow label. Look for yellow label.

State District Attorney Evans' Alcohol Supply

Portland, Ore., May 9.—And speaking of nerve, what do you think of this?

One or two men jimmied open a window in the home of District Attorney Walter Evans, carefully went through the house, found \$200 worth of jewelry and a quart of alcohol and safely departed.

The best men in the police detective bureau and the sheriff's office were assigned to the case, but the naughty burglar didn't leave even a fingerprint, and the police today had about decided to give up the hunt.

"It's a mighty good thing for that guy that he got away," observed one detective today who had been working on the case. "Believe me, if we had caught him, he would have been prosecuted."
