For Economy's Sake Buy Advertised Goods When you buy sugar you pay less per pound when you buy it by the dollar's worth. You pay still less per pound when you buy it by the hundred-pound sack or by the barrel. The same is true of the manufacturer and the merchant. The larger quantities of anything that he can buy the less he has to pay for it. It costs less to handle it in large quantities than in small lots. It costs less per pound to ship in solid carload than it does to ship a carload in separate shipments of 100 pounds each. Just as it costs you less to buy a hundred pounds of sugar at one time than it would to buy a hundred pounds a quarter's worth at a time. Less in money. Less in time. Less waste—less in every way. The manufacturer and merchant who advertise are enabled to buy and to sell in larger quantities. By doing a "quantity" business they cut expenses and save waste on every hand. They can sell better quality—pay the small advertising cost—and SELL FOR LESS than if they were doing business in a small way. In these times of advancing prices carefully compiled statistics prove that the advertised brands of merchandise have advanced much less in proportion than those which are not advertised. In the interest of economy buy advertised merchandise from merchants who advertise.
