

Good news for the thirsty! Here's a beverage that not only will taste good while you are drinking it, but that will leave the mouth tasting as fresh as a May morning. One, too, that has that very desirable quality of having no heat- after-effects.

As a between-meals drink it has the happy faculty of always reaching that dry spot that needs irrigation. With meals, it is an ideal beverage. Not only does its flavor make it go perfectly with food, but its tang adds zest to your enjoyment of a meal—hot or cold.

Flour Will be Lower
Minneapolis, Minn., Aug. 31.—Flour prices will come down as a result of fixing wheat prices on the basis of \$2.20 for number one northern spring, according to millers here today. They were uncertain how great the drop would be.

"The price fixed will naturally mean some reduction in the price of flour," said John Crosby of the Washburn-Crosby company. "How much it will be reduced depends on the government. The government will deter-

mine finally how much we are to be allowed for cost of manufacture."

A. C. Loring, president of the Pillsbury Flour Mills company, said the reduction in the price of flour would make it "a great deal less than this spring."

Farmers expected not less than \$2.50 for wheat. The price finally agreed on by the government committee will mean that northwest farmers will receive less than \$2 for wheat, some grain men declare. Grain men are inclined to be content with the figure would be.

wheat price committee, headed by Dr. H. A. Garfield. The basis will be No. 1 Northern Spring wheat delivered at Chicago.

At one time it looked as if the committee would be unable to come to a conclusion, but just before 6 o'clock a compromise was reached, and the last vote was unanimous.

The committee, in its report to the president, gave as its three chief considerations the following: The fact that the United States is at war; the need of encouraging the producer and the necessity of reducing the cost of living to the consumer. All members agreed in their discussions that the price fixed will permit of a 14-ounce loaf of bread for 5 cents, allowing a fair profit both to the flour manufacturer and the baker.
