SUFFERERS OF EPILEPSY Should read the following testimonial and take advantage of the great health science that restored this man:

To Whom This May Concern, and Those Suffering from Epilepsy:
I was a sufferer of Epilepsy for five years and was growing steadily worse, having as many as five or six fainting spells in one week. I had tried all kinds of treatments and so called cures without avail, and had given up as I felt there was no relief for me. One day in reading the Daily Capital Journal, I saw Dr. May was maintaining a free clinic in Chiropractic adjustments; after receiving no benefit from medicine, I decided to try Dr. May and see what his science could do for me. I began taking adjustments on Nov. 29th, and on Dec. 1st I had a slight attack but have not had one since.
I feel so happy I am cured of this dreadful disease that I want to tell everybody about it, in the hopes that others that are suffering as I did will take advantage of Chiropractic and get relief.
Signed: W. H. BARTON, Salem, Ore., R. 3, Box 108.
This 16th day of March, 1918.

CHIROPRACTIC THE ONLY KNOWN METHOD OF CURING EPILEPSY

Dr. Kebler, a well known medical student says that the common treatment known as Bromid treatment used by the medical profession in treating epilepsy is used simply as a sedative and that its physiologic action has been quite well defined; that it is not a cure; and that treatment tends to suppress the attacks, and that the medical science today has no drug treatment that will cure Epilepsy.

The indiscriminate use of Bromids is dangerous. Dr. Kebler is quoted by the American medical association as being authentic.

If this is true and the case in Salem as stated above has been cured by Chiropractic, why don't you who suffer from this terrible disease, let Chiropractic help you?
