BAKER WILL SPEED UP TRANSPORTATION

Writes Officers in France He Will Hurry Remainder of Army to France

With the American Army in France, April 18—Secretary Baker, in a letter to the American expeditionary force, made public here today, promises to speed up the transport of the remainder of the great army, of which you are the vanguard.

"After a thorough inspection of the American forces," the letter said, "I am returning to the United States with fresh enthusiasm to speed up the transport of the remainder of the great army, of which you are the vanguard."

"What I have seen here gives me the comfortable assurance that plans for the effectiveness of our fighting forces and welfare of our men have been broadly made and vigorously executed."

"The relations of our soldiers with the British and French are uniformly cordial. The welcome of the civil population of France is met by our soldiers with chivalrous appreciation. In return we are building a great army for the vindication of a great cause."

General Pershing issued the following statement in connection with the secretary's letter:

"Adding to my own high appreciation of the splendid spirit of the army, your commander in chief wishes to impress the officers and men with a keen sense of the serious obligations resting upon them, while giving fresh assurances of my complete confidence in your loyalty and courage and sincere devotion to duty."

A part of the cargo taken on board at the local wharf yesterday by the Gramma on its downward trip to Portland was eight tons of hop wire, which is shipped to Portland and there converted into barbed wire for use on the battle fronts in Europe. Those who have followed the river transportation business say that in past years every boat at certain seasons would bring quantities of wire up the river for use in the hop yards of the valley, but now it is the reverse, each trip the boat makes down the river there being from a few up to twenty or thirty tons of wire on board which is being converted into barbed wire for use as above stated.
