

Why the Children's Clothes Wear Longer

Children's clothes get mighty dirty, but Fels-Naptha removes the last particle of grime without hard rubbing.

That is a big saving, because with an ordinary soap, washing children's clothes is harder on them than daily wear.

No hard rubbing; boiling unnecessary; it's wonderful how Fels-Naptha saves the clothes for long wear.

To keep white clothes white, use Fels-Naptha

SINN FEIN GERMAN

(Continued from page one) eyed me suspiciously, but did not stop their drilling. A couple of miles down the road, a pair of lookouts on bicycles dogged the steps of several policemen, ready to warn the drilling men should the police show any hostility.

In front of Dublin churches, Sunday girls sold anti-conscription flags. Thru-out the day small boys marched behind rifle and drum corps bearing the Sinn Fein colors and at night groups of young men sang soldier songs in Sackville street. I myself saw girls marching and drilling after they had been in church.

Inasmuch as the total authorizations and appropriations will not be spent within the year, this sum, congressional leaders said, will doubtless see the government through. Enforce License Tax Under City Ordinance

Taxi drivers, jitney drivers and all others who operate automobiles for hire are looking for trouble if they do not pay their annual license of \$15, according to instructions issued to Chief of Police J. A. Poland by the city attorney, B. W. Macy. The instructions read that the chief is to arrest all drivers who cannot show their license today. In Salem there are about 17 automobiles operating for hire and so far this year, the owners have chosen to ignore the law providing for a \$15 annual license. This ordinance was passed in 1913 and heretofore the auto owners have been inclined to pay their license fees. But so far this year, only two have complied with the law.

RAILROAD RATES

(Continued from page one) selled and domestic rates will apply to and from ports. Less than carloads will have a fifty cent minimum charge and roads hauling a carload will demand a minimum of \$15. Important established rate groupings and fixed differentials will be continued where found practical.

Coal Cost Increased As for passenger traffic, rates now above three cents will not be disturbed; round trip touring fares will be somewhat high, effective June 15; passengers traveling in standard sleepers or parlor cars will be subjected to an additional half cent per mile rate for travel tickets in addition to tourist rates for the seat or berth itself; tourist sleepers similarly will be subjected to an added quarter cent per mile. Commuters must pay ten per cent more than now, while water rates will be advanced in portion to rail rates.

Men in the service will obtain one third fare rates when on furlough or leave of absence, but not between camps and nearby cities or ports. The need for the increases was pointed out by a table showing that, whereas in 1915 the railroads used 122,000,000 tons of coal at \$137,500,000; they are now using 166,000,000 tons costing \$189,700,000.

Taxes, rents or other costs similarly have gone skyward, resulting in demands for rate increases, granted in a total sum exceeding \$300,000,000 annually. Abnormal conditions of operation, resulting from the war, may cause further increases in operating expenses, it was pointed out, but whether the expenses are raised or lowered, it was deemed advisable to have a sufficient margin so that the roads would not become a burden on the treasury.

These advanced rates are applicable to both state and interstate traffic. Some readjustments may be necessary in time and the interstate commerce commission is prepared to handle such cases. "It is earnestly hoped," said Director General McAdoo, "that all citizens affected directly or indirectly by this increase of rates will support the general principles of such increases as an unavoidable war measure and accept the additional burden in the same spirit of self-sacrifice in which they have accepted other inconveniences and losses which are parts of the price that the nation is patriotically paying for world liberty."

In considering these increases, one vital distinction which makes them fundamentally different from any rate increases ever proposed or allowed when the railroads were under private control should be understood. This distinction is that there is no way in which the present increases will inure to private profit. If they turn out to be more than are needed to meet the great emergency, they will promptly be readjusted so as to prevent any unnecessary burden upon the public, but pending such readjustment the excess if any will be for the benefit of the United States and as a whole and not for the benefit of private railroad owners.

To the extent that savings that can be effected and to the extent that can be realized, it will be the purpose of the director manager to make from time to time appropriate reductions.
