At the request of Corporation Commissioner Schulerman, Assistant Attorney General Van Winkle rendered an opinion this morning concerning the requirements of the law with regard to filing articles of incorporation. It seems the Grouse Creek Mutual Ditch company filed articles of incorporation among other things giving the principal office as located "at the residence of one of the stockholders residing along the line of ditch which may be changed from time to time." Instead of stating the amount of the capital stock and the par value of the shares the statement was that "the capital stock shall have no value apart from the lands of the incorporators their successors or assigns."

The opinion holds that not only does the statute require the statement of the amount of the capital stock, but that without it the commissioner is unable to fix the amount of the fee to be collected and stated in the certificate. The opinion adds: "Articles must contain only the matters and statements required by the statute. If additional provisions and regulations are inserted they are void." It also holds the commissioner must reject articles of incorporation offered for filing unless they comply with the requirements that a definite statement of the amount of the capital stock, the location of the principal office, the number of shares and the par value thereof be stated.

Articles of incorporation were filed this morning as follows: Joly Hatley, of Portland, capital stock \$100,000 and object to conduct a general printing business. Miller & Obst, of Portland filed notice of dissolution.

Attorney General Brown is recovering from his attack of pneumonia and will probably be back in his office early next week.

WOOLEN SHORTAGE DENIED

Washington, June 24.—Reports of shortages of woollens and woollen clothing for the civil population were officially denied today by the war industries board in a warning to dealers not to speculate in woollen commodities. "There is no official warrant, the statement said, for statements or rumors to the effect that it will soon be impossible to buy woollens or woollen clothing sufficient to meet actual requirements for the civil population. "The present speculative movement

in cloth and clothing will undoubtedly compel definite penalizing action if persisted in. There are at present ample stocks of cloth and clothing and there is no excuse for inflation."

Salem. Her ambition is to make "Herbert Hoover", a Duroc, fit to win the first prize at the state fair. "Herbert Hoover" happens to be her little red pig, and she confesses that this "Hoover" is not Hooverizing, as she is feeding him regularly three big meals a day. Miss Daisy has recently finished her 10 lessons in sewing, besides making herself useful about the house.

Running a gasoline tractor and plowing and cultivating 100 acres of land is keeping pretty busy Miss Mildred Hubbard, age 16, who lives in school district 80, the Eldridge school, not so very far from Gervais. She also is a member of the sewing club, and when not running the tractor and sewing, she is doing some canning for a state fair exhibit.

Away up in the hills 12 miles east of Silverton, three young girls are doing a m-r's work, as their brothers have left the farm and are employed in the logging camps and ship yards. They are of the Patterson family and Maud and Mildred are twins, 12 years old, and Lina, 15 years old. They do the plowing and are running the home farm and are doing their part in helping to win the war.

Girls will crowd the boys at the coming state fair when it comes to raising pigs, for there is Mabel Johnson, 15, and Edna Johnson, 13, who live about two miles south of Gervais and right now they are raising pure bred Durocs. These pigs will be an haul at the state fair and from the reports of Mr. Hoppes, they are not suffering to any extent for a lack of attention and proper nourishment.
