## TWENTY-FIVE KILLED SEVENTY-FIVE INJURED IN TRAIN WRECK TODAY

### Two Passenger Trains Crash Together Near Bosley Springs, Tennessee

Nashville, Tenn., July 9.—About twenty-five persons were killed and 75 injured when two Nashville, Chattanooga and St. Louis passenger trains crashed together near Bosley Springs, at 7 a. m. today.

Fire immediately broke out and many of the passengers who were not killed outright in the collision were burned to death or suffered injury from the flames.

A relief train was immediately rushed to the scene from Nashville manned with doctors, nurses, firemen and first aid equipment.

The mangled and charred bodies brought here were distributed among local morgues.

No effort has been made to estimate the dead as it has been impossible to enter some of the splintered and burning cars.

Both trains were running at a high speed when the crash occurred, the engines being telescoped and the coaches reduced to kindling wood.

The greatest loss of life occurred in the coaches occupied by negroes which were crowded.

Every ambulance in the city was pressed into service. Later, as the rescue work progressed, St. Thomas infirmary became overtaxed and a great number was removed to the city hospital.

Attendants at the hospitals were so overburdened with operations that they were unable to supply an accurate list of the injured.

## CARLTON TESTIFIES BEFORE COMMITTEE

### President of Western Union Is Called For Views On Wire Control Problem

By L. C. Martin,  
(United Press-Staff Correspondent.)  
Washington, July 9.—Newcomb Carlton, president of the Western Union Telegraph company, today appeared before the senate interstate commerce committee on the resolution empowering the president to take over the telegraph and telephone lines.

Having been rebuked by the senate for reporting the resolution yesterday without investigation, the committee met again today. Carlton, who happened to be in Washington, was summoned to tell of the strike situation and give any information he had as to the necessity of the government over the lines.

Following Carlton's testimony, representatives of the employees may be heard. An effort is to be made to report the resolution today.

**Senate in Turmoil**  
Washington, July 9.—Still in a ferment today the senate resumed its effort to reach an agreement on what it wants to do about wire control legislation.

With prohibition shelved temporarily, Senator Sherman, Illinois, began a bitter tirade on the bill itself, calling many of its items ridiculous.

"I suppose its almost regarded as sacrilegious laying profane hands on anything pertaining to agriculture," Sherman said.

"Little by little items have crept in to these bills, so like charity they cover a multitude of sins," he said.

## GREAT WHEAT CROP NOW FORECAST BY OFFICIAL ESTIMATES

### Yield Will Fall Little Short of Nine Hundred Million Bushels

Washington, July 9.—The American farmer will turn out a 891,000,000 bushel wheat crop this year, according to July 1 estimates, announced by the agriculture department today.

This shows a slight falling off from the June 1 forecast, which predicted 911,000,000 bushels.

With threshing well under way in some states, the winter wheat crop bids fair to yield 557,000,000 bushels, as against 552,000,000 bushels, the 1917-1918 average, and 587,000,000 bushels forecast of June 1. The spring wheat crops, it is estimated, will aggregate 334,000,000 bushels as against a 1917-1918 average of 257,000,000 bushels and a forecast yield of 349,000,000 bushels on June 1.

The condition of winter wheat is 79.5 as against 75.9 a year ago and 80.6 for the 10 year average; the condition of spring wheat is 86.1 as against 83.6 a year ago, and 83.9 for the ten year average; the condition of all wheat is 81.9 as against 78.9 a year ago and 81.3 for the ten year average.

The total oats production forecast for July is 1,437,000,000 bushels as against 1,500,000,000 bushels of the June forecast. The barley production forecast for July is 2,000,000 bushels as against 2,000,000 bushels of the June forecast and the rye production forecast for July is 81,000,000 bushels as against 81,000,000 bushels for the June forecast.

The total corn production forecast was 3,160,000,000 bushels as against 2,707,000,000 bushels the 1917-1918 average.

The condition of corn July 1 is 87.1 as against 81.1 for last year and 83.6 for the ten year average; the condition of oats on July 1 was 85.5 as against 89.1 a year ago and 84.5 a year ago and 84.7 for the ten year average and the condition of rye is 80.8 as against 79.4 a year ago and 88.3 for the ten year average.

The yield per acre for winter wheat is estimated at 15.3 bushels as against 15.7 for the last ten years. Spring wheat 14.4 bushels as against 13.1 for the ten year average; all wheat, 15.1 bushels as against 14.7 for the ten year average; corn 27.8 bushels as against 28.6 for the ten year average; oats 32.3 bushels as against 31.2 for the ten year average; barley 25.2 bushels as against 25.1 for the ten year average; rye 15 bushels as against 16.1 for the ten year average.

The average yield per acre for other crops is estimated as follows:  
White potatoes is 98.6 as against 95.9 for the ten year average; sweet potatoes, 96.1, as against 93.6 for ten year average; tobacco 817 pounds as against 816; flax 8.0 as against 8.2; rice, 38.7 as against 35.5; hse, cons, 1.46 as against 1.31; cotton, pounds, 200 as against 179.6.

The total production of apples is estimated at 195,000,000 bushels as against 214,000,000 for 1917-18 average production; peaches, 40,300,000 bushels as against 49,600,000 for the 1917-18 average.

## FLAT RETAIL TAX NEW REVENUE PLAN

### Ten Cents Per Gallon On Gasoline Also One Provision of Proposed Bill

Washington, July 9.—The treasury department today recommended a flat tax on retail sales and a specific tax on manufacturers and producers as a part of its new program, presented to the house ways and means committee.

If the recommendations are followed—virtually all household needs—will be affected, including men's clothing costing over \$30, women's clothing over \$40 and children's clothing over \$15; furniture sets costing over \$5 for a single piece; servants' wages, etc.

Among the striking taxes proposed are ten cents a gallon on gasoline levied on the wholesale dealer.

Others include 25 to 100 per cent on the wages of household servants. In the case of male servants, 25 per cent for one servant, with an additional 25 per cent for each additional servant up to four. In the case of female servants, each family to have one, tax free, and a graduated tax of 10 to 100 per cent in cases where there are more; 50 per cent on the retail price of jewelry; 10 per cent on all hotel bills amounting to over \$2.50 a day; 10 per cent on telegraph wire leases; doubling the present tax on all club dues; 10 per cent on all restaurant bills over \$1 a person and a license tax on passenger automobiles, graduated according to horse power, beginning at \$15 for all machines of 23 horse power or less and running up to \$50 for all machines of over 40 horse power.

Present taxes on yachts, motorboats, perfumes, patent medicines, liquors and tobacco are doubled.

## War Summary of United Press

### 1437th Day of the War; 111th Day of the Big Offensive

One front—The French attacked on a front of two miles and a half west of Antwerp early today, advancing more than a mile and taking 450 prisoners.

Marne front—Allied and German artillery engaged in an active duel north west of Chateau-Thierry which includes the American sectors around Vaux and Boursches. The French made a successful raid near Chavigny farm, south west of Soissons, taking twenty prisoners.

Pleary front—German artillery continued to bombard positions south of the Somme taken by Australians and American troops July 4. The British made a successful raid east of Arras.

Italian front—The Italian war office announced that between July 2 and 6, the Austrians lost twenty thousand men—about half of the troops they engaged.

Germany—Herr Strechel, an independent socialist addressing the Prussian Landtag, declared that resumption of the German offensive is necessary but that the result is doubtful. He said the German losses in the spring drives were more than 100,000 in killed alone, and that the losses in the new drive probably would be higher.

Austria-Hungary—Austria is reported to have refused to accept a German commander in chief on the Italian front.

Russia—Martial law has been proclaimed in Moscow and several former members of the Kerensky cabinet have been arrested, indicating that the counter-revolution has been put down by the bolsheviks.

## Austria Refuses To Accept German General

Rome, July 9.—Austria has refused to accept a German generalissimo to direct operations on the Italian front, according to advices received here today.

Recent reports said that in the general shakedown of the Austrian command, General Von Below, who directed the former Austrian offensive had been commander in chief of the Austrian armies. Later, it was said that General Ludendorff had hurried to Austrian headquarters, evidently to make Von Below's appointment effective.

## New Training Policy For Drafted Men

Washington, July 9.—Only six months on American soil, are to be sent to France under a new program being worked out by the war department. Enlistment of several thousand men to be sent to France as a part of this plan. The recent practice of rushing troops across with only three weeks or more training is to be abolished now that a fighting force of considerable strength has been placed on the allied lines.

With over one million men in France, facilities there are becoming more burdened and there is little room for untrained troops. Under the new policy drafted men will be put thru an extensive six months training course, the units weeded out and the remaining fighting men sent across for a short finishing off behind the lines.

## State Fire Marshal Will Assist Heppner

Captain George W. Stokes of the state fire marshal's department has gone to Heppner to assist in reorganizing a fire department, so a loss such as was sustained in that town July 4 when four blocks were destroyed by fire, may not be repeated.

Fire Marshal Wells has suggested that the company of home guards at Heppner be enlisted in a fire company, so many of the young men have entered the war it will be difficult to get material for a separate fire fighting organization.

After the fire which occurred in Heppner May 27, representatives of the state fire marshal's department made an inspection of that place and found conditions which were a great fire menace to the town. Attention was called to them in a report prepared June 29, but the report had not been submitted to the mayor of the town when the July 4th fire occurred.

## Ten Acre Cherry Orchard Brings Owner \$3,300

B. E. Carrier has a ten acre tract of cherries over in Polk county that will turn in an average of \$330 an acre this season and even then, he says, it is not a fully developed orchard and expects it to do twice as well when it comes into full bearing.

The receipts so far this season for the Bings, Royal Annes and Lamberts amount to \$3,300. The orchard is about five miles from Salem.

## CENTRAL EMPIRES TO BE RATIONED

### Stringent Regulations Will Be Put On Force Says Food Controller

Amsterdam, July 8.—All Germany and Austria-Hungary now will be subjected to food rationing and prohibition of free trading, Food Controller Von Waldow announced in the German reichstag Saturday, it was learned today.

"It will be some time before large consignments of corn arrive from Ukraine. The meat ration will be reduced. As soon as the bread and potato rations are restored meatless weeks will be introduced."

Replying to Von Waldow, Herr Waiss, socialist, said:

"Further deterioration of the food supply will be unbearable. The wages of the workers will not be adequate for food even now, and unemployment is increasing. If the situation continues the strikes of January will be repeated."

The Tageblatt announces that beginning August 1 there will be one meatless week a month.

## University of Oregon Training Camp Pleases

University of Oregon, Eugene, July 9.—Results from the first civilian summer training camp on the Plattsburg model, held at the University of Oregon have so pleased Col. John Leader, late of the British army that he is considering holding a second camp August 1 to August 31. Leader is now professor of military science at the university.

At the present camp, which has been in operation little over two weeks, are 150 student soldiers, mainly business and professional men, many of them of draft age, who are improving their vacation period by making themselves fit for military service.

"Almost all the men now in camp will make officers," said Col. Leader today. "In all my career I have never seen men learn faster than they. They have accomplished more in two weeks than recruits usually do in months."

The day at camp begins with reveille at 6:30, and from then until taps is sounded at 11 o'clock at night the men are kept busy at a wide variety of military subjects. The work day begins before breakfast. In open-order formation the men are lined up on Kincaid field and put through a severe course of Swedish gymnastics or setting up exercises for half an hour.

During the first week Director O. C. Manthe of the Multnomah Amateur Athletic Club, who is in charge of this department, tested the men's soft muscles severely, and some even were unable to get through the half hour's work, but lay stretched out exhausted on the field before the end of the period. But they came back for more and have been rewarded with a physical condition which many of them have never enjoyed before, with the ruddy glow and clear eye of physical fitness.

After breakfast the real military drill commences. Parade work is only a small part of the instruction. Marching, facing, squad and company formations have already been mastered, and some time is now given to open-order work and skirmishing, with an occasional sham battle to illustrate some military principle.

One of the stiff courses is entitled military engineering. It consists of trench construction with pick and shovel.

Field problems will be worked out on the hills about Eugene.

Intensive instruction is given in bayoneting, bombing, camouflage, signaling, map making and other subjects.

Of the 150 men now at camp, ninety are from Portland.

## Marion County Boy Makes Record In Navy

Another Salem or Marion county boy has "made good" in the service of Uncle Sam.

Arthur Hartley, in the service less than 5 months, Arthur Hartley, son of Mr. and Mrs. Phil Hartley, of this city, has finished his schooling with high honors and has been advanced to the grade of First Class Quartermaster in the navy. He finished second high in a class of 40 students. This gladsome news came to the proud parents, and the entire family, in a letter received a few days ago.

Arthur Hartley, who in private life, farmed the home place, on Ashkeny bottom, with his father until he heard the call to the colors and responded on February 15 of this year. He chose the navy because of service and secured his preliminary training at Bremerton Navy yard and was transferred to New York in April. There he entered the special training school for petty officers and has just emerged with high standing. During his course of technical training he made several cruises and expresses his delight with his experiences and the excitement of the service. He is now anxious to get into the thick of it and can hardly await an assignment of post.

He writes his parents and sisters, of the latter of whom he has nine and all of whom but one, Mrs. Myrtle Cannon, of Roseburg, reside in Salem and Marion county. Before he enters active service he expects to get a further visit in the near future. His pay, due to his earned promotion in rank, has been increased to \$52.00 per month, including rations and all clothing allowances.

## Moderate Strength In Wall Street Today

New York, July 9.—The New York Evening Sun financial review today said:

Barring weakness in one or two specialties and moderate strength thru out the rail list, the market in the New York stock exchange moved sluggishly without pronounced trend in either direction, but with a firm undercurrent. The advances in the rails ranged from a fraction to three points. St. Louis preferred, with a rise of three points, was the strongest rail issue, but a great deal of attention was paid to the rise of more than a point in Pennsylvania. The entire list advanced. General Motors American Hide and Leather preferred and American Railway Steel Spring were fractionally weak. On the other hand, United States Steel advanced a fraction and the firm industries in the early trading included American Can, the marine issues and tobacco stocks.

The Northwest Steel company of Portland has filed with the corporation department an increase in capital stock from \$200,000 to \$1,000,000.

Articles of incorporation were filed today by the Fern Valley Coal company of Medford, which has a capital stock of \$5000. The incorporators are Leonard Carpenter, Frederick H. Cowles, Alfred S. V. Carpenter, Waldo W. Willard and Lincoln McCormack.

## Jordan Valley Irrigation Project To Go Ahead

With the contract between the state and the company properly signed and in his pocket, Paul S. A. Bickel, chief engineer for the Jordan Valley Land & Water company, left Salem Monday night ready to put through the Jordan Valley irrigation project within three years.

The contract allows us five years, but we will complete the project in three years," declared Mr. Bickel, who has had more experience in constructing irrigation projects than probably any other man in the west.

A considerable amount of work was done on the Jordan valley project before the company which is really the Money Brothers of Oklahoma City, had ever obtained a contract from the state. Mr. Bickel said approximately \$100,000 already has been spent on the project, and 70-foot dam for the big reservoir is constructed about 40 feet high. The completed project will hold 127,000 acre feet of water. The reservoir itself covers 5300 acres. Some of the land already is under irrigation, and a colonization agent is selling other lands under the project as rapidly as possible. The land is being sold for \$71 an acre, which includes water rights. About 30,000 acres are to be reclaimed.

## Spaulding Company Want to Add Shift

If laborers can be found, the Spaulding Logging company will go on a two day shift, beginning next Monday, July 15. Working on shifts of eight hours each, the company is calling for about 75 more men.

The mills at Salem and Newberg are supplied with logs from five camps. The Day camp is at Black Rock, the Buldore, Ritzner's and Holt camps are on the Lucknamute and the other camp is at Mary's river.

The output of the two mills now is from five to seven millions of feet a month and the company has war orders and other business booked enough to offer permanent employment to at least 75 men in addition to the present force. Lights are now being installed throughout the yards in the Salem plant, ready for the two shifts should sufficient laborers be found.

Wild West Re-Enacted In Washington Yesterday

Goldendale, Wash., July 9.—Wild west scenes were re-enacted yesterday near Garnet, when a sheriff's posse round-
