Officials of the Bethlehem plant claimed a beat of three days over the record of the Tuckano. The Invincible's steel was laid July 4. Four Sundays and a two-day strike lengthened the elapsed time.

EDDIE RICKENBACKER

(Continued from page one)

any one of a dozen good excuses for zooming off home and leaving you to do the same if you could get away, he'd be a gimper all right. A gimper is a scout who does everything just a little better than he has to.

We call this the gimper squadron because every man has to prove himself a gimper by his actions. When a chap arrives, he's an egg. All good eggs soon become valtures and they're promoted to goopher standing. Then is when they have to prove themselves gimpers, and they'll be gimpers just as long as they make good. A man who isn't a gimper can't stay with the squadron—its zoom for him back to the woods.

Gimper means a lot to us. It means more than good scout, or old pal or comrade. I got the word from a mechanic I had when I was in the racing game. He was a gimper, and I knew when he finished with a motor she would run. In this man's life there were two kinds of people, gimpers and bums. There were mighty few gimpers in the world and lots of bums, as this mechanic put it and it took a good man to be a gimper.

The pursuit and fighting part of aviation requires a type of aviator who will stick, especially the way we fly in groups. To do your best work, you must have a mutual feeling of confidence in the gimper flying beside you that is unequalled anywhere else. If you have a gimper with you, you know he won't make a mistake in judgment or lose his nerve at the critical time. A gimper couldn't do that—if he lost his nerve just once, he'd never be a gimper again. We all know that, and no gimper ever loses his nerve.

I don't mean a gimper will always pique into a crowd of Huns, no matter their number. A good gimper knows when to fight and when not to fight. If he hasn't a chance, he draws off, flies around until he gets his altitude and then drops on the Heinies. A gimper doesn't need to be foolhardy. He watches his chances, but never gives up when another gimper is being strafed.

When you're flying around up there, over Germany, and being followed by a string of black puffs from the German Archies, and hear them exploding around you, and then see some German planes off to one side of you, it is the easiest thing in the world to pretend you don't see them, and keep straight ahead until you pass them. Usually, the Germans are willing to do that, too, unless you attack them. But a gimper never lets himself fail to see them. He maneuvers around until he can pique on them and let them have it until they run home. Then he's satisfied he's a gimper.

Another time there was a German pill box that annoyed O'Rourke. A pill box is a cement fort that stands about six inches above the surface of the ground. There are openings from the end which those inside can direct enfilading fire.

You'll agree with me that the thing O'Rourke did was not sporting. He didn't even give the Germans inside the pill box a chance. Behind the smoke screen of his own making he reached the pill box. Outwitted Them.

Did he charge thru one of the openings? He did not! He climbed on the roof, which was easy to do, and, flat

on his telly, threw bombs down through the openings.

Thus he killed eight German and took two prisoners who were hiding in a closet and shouting: "Kamerad!"

Sergeant Hallwood, who came up about then, was for bayonetting the prisoners, but O'Rourke says no; he had work for them to do.

He turned the pill box into a hospital to which he made the prisoners bring the wounded.

He's Tender, Too. One queer thing about O'Rourke I do not understand. He'd kill a boche as soon as look at him. But when he finds a wounded man he's all tenderness and nothing'll do but he must be carried away to a hospital to have his hurts mended. Comrado or boche, it's the same to O'Rourke.

I'd hesitate to tell you how many German's O'Rourke has killed—hundreds! And how many scores of wounded men he has succored, and how many times he has risked his life, and how many times he has used his wits to good purpose.

Is Thrice Honored. 'Twould take a book to tell the whole story. I've told you enough—the rest is up to sample. For Private O'Rourke is the only man in the Canadian army who has all three of the British honor medals, including the Victoria Cross. So you'll not be wasting your time at the Armory tonight, even if the speaker is a private in the ranks.

Good Work Being Done On Country Roads

There has been a lot of good work done in road district No. 14 this year despite the labor shortage. This district comprises a large scope of territory extending from the city limits on the east and going as far as the divide. A. Oeder is the hustling overseer who keeps the good work moving. So far this year the road leading from the Davis school house and ending at the Henry DuVal ranch has been completed with maseadam. On what is known as the John Porter road the base will all be put down and probably finished. About one-half mile of finished road has been put down on the main highway. Considerable improvement has been made on the Quail road. This district has an assessed valuation of \$900,000 and there is being expended on the roads this year \$4,000.—Silverton Appeal.

A Mills grenade explodes three seconds after the pin is pulled.
