War Summary of United Press

1471st Day of the War; 29th Day of Counter Offensive

Clearly front—After a night of comparative quiet, the French today made important gains over a front of nearly twenty miles, extending from the center of the battle front near Roye to the extreme right wing, southeast of Ribecourt.

GERMAN U-BOATS

(Continued from page one)

being struck the whole deck amidships was awash, and the crew left the ship. The ship, they state, was standing directly up and down with the bow in the water, about 14 feet being visible.

The captain and his 30 men got into two boats and made for Sandy Hook. They were sighted by a submarine chaser at 8:35 a. m. and rescued. Four of the men of the crew reported that they saw a periscope sticking about six feet out of the water and moving very rapidly. The torpedo they estimated was about 12 feet long.

The "boomeranging" of the torpedo responsible for the sinking of the Somerset was attributed by naval officials here to a jammed rudder. It was pointed out that if the rudder did not function properly a torpedo might very easily swerve in its course and completely turn around.

That the Hun gas attack off the South Carolina coast may be followed by other similar attacks was the belief of navy men today. According to reports made to the department on the attack on the light-house the gas was effective 35 or 40 minutes. Its color has not yet been ascertained nor its effect on trees and shrubbery, but a full report on the attack has been asked by the navy department.

Fishing Boat Crews Rescued. An Atlantic Port, Aug. 13.—The fishing schooner Annulla arrived here today with 14 men from the fishing vessels Progress, Star Buck and Helena May, all sunk by a submarine off Georges banks. The men were picked up eighty miles southeast of Cape Cod.

The crew of the schooner Mary A. Sennett, which was brought to this port, told of the sinking of the schooner Old Timer and Cruiser. They declared the crews of these vessels were shelled when they left their ships and probably were killed, as nothing was seen of them after the vessels sank.

The attack on the Mary A. Sennett, the Cruiser and the Old Timer was made by two submarines, according to the survivors. This is the first report that more than one submarine took part in the Georges bank raid.

The fishing vessels known to have been sunk are the Progress, Helena May, East and Nettie, Reliance, Mary A. Sennett, Star Buck, Kate Palmer, Cruiser and Old Timer.

Light-house "Gassed." Washington, Aug. 13.—Gassing of an American light-house by a German submarine confirmed expectations of naval officers here today that the Germans sooner or later would make some spectacular display on the coast. No military advantage can result from such attacks, as the one against the Smith Island light off the North Carolina coast Saturday, but the Germans evidently hoped to terrorize by such methods. Sinking of fishing ships off the New England coast is part of this campaign of frightfulness.

In making their gas attack on the Smith Island light-house, which injured six men, none fatally, the Germans are believed to have used a new form of mustard gas. Official reports to the navy department state that three large oil spots, each over an acre in extent, were observed on it is believed the gas was generated from this oil. The attack lasted nearly an hour.

Diver off Fire Island. An Atlantic Port, Aug. 13.—Passengers arriving today aboard a British steamer reported their vessel received a wireless yesterday afternoon, apparently from a United States patrol boat, stating that a U-boat had been sighted off Fire Island on the New York coast and that other patrol boats were pursuing it.

Another wireless, received at four o'clock this morning from an unidentified Danish steamer, is declared to have stated that the steamer had been attacked by a submarine off Nantucket Island and was sinking.

The British steamer left England with a convoy, but became separated from the other craft in a fog the first day out and made the rest of the voyage alone.

Arthur than to stick around here at the exhibition park and exhibit and go over the top.

"Great Life" writes Page. E. M. Page, who has been away about a month and is now stationed at Fort McArthur in the coast artillery. He seems to like his quarters as he writes: "I think perhaps we have the best camp in the country for the weather. It is ideal and as we are right on the ocean the hot weather of southern California does not affect us a great deal. At present we are attached to the Los Angeles Coast Defense Artillery corps but may soon move as rumor has it that we will receive the major part of our training in Virginia."

"There are four members of No. 335, B. P. O. E. here although I am the only one in our company. Brother John Carson is somewhere in the fort and Brothers Ed, Viesko and Price are at present on guard duty in Los Angeles but will return next week."

"Tell any of the boys who are coming that it is a great life and the only one to live and one will never realize it until it is. The only thing I do not like is the 5:15 call in the morning for it seems like getting up in the middle of the night. We work hard all day but everybody is happy and willing to get in shape to go over."

Ohio State Primaries Are Being Held Today

Columbus, Ohio, Aug. 13.—Ohio's primaries were on today. The present democratic officers, including Governor Cox, are unopposed for re-nomination except that Justice Oscar Newman, Portsmouth, is one of three candidates for two places on the

SOCIETY

By MABEL GARRETT

In accordance with the demand of the time for more definite and concrete knowledge of first aid work, the Woman's Relief Corps will be given an opportunity Thursday afternoon at the armory to learn some practical ideas and facts along this line.

Miss Grace Taylor, who has been connected with the Salem schools as a nurse, will give a lecture-talk on this timely subject. The general aim is to educate the women so that they can do all the nursing in their own families and thus release the trained nurses for work overseas.

At the meeting of the Aid society of the Woman's Relief Corps last Thursday, much of the work outlined for the afternoon was accomplished. Beside one quilt that was donated the women, finished one comfort and pieced a large number of blocks for another quilt. Later in the afternoon, refreshments were served by Mrs. Norma Terwilliger, Mrs. Mary Cooke, Mrs. Hannah Higgins and Mrs. Hagedorn.

Mrs. Dorothy Pearce, daughter of Mrs. George J. Pearce, 237 North Winter street, left last week for the coast where she will be at the Damon for several weeks.

The home of Mrs. James Elvin, 440 Center street, was the scene of a pretty birthday party yesterday in honor of little Julia Elvin's seventh birthday. Eight of her little friends gathered to enjoy the merry games that had been planned. Later in the afternoon dainty refreshments were served with a pink and white birthday cake shining with the tiny bright candles.

Glyde B. Clancey, accompanied by Ernest H. Choate, left for Tacoma Sunday morning, for a short visit with Mr. Clancey's parents, Captain and Mrs. Charles Clancey. They will visit Camp Lewis and Seattle before their return. They plan to be gone about a week.

On account of the Belgian Fete Friday, the Red Cross auxiliary of the first Congregational church will meet all day Wednesday, for their regular work instead of Friday, which is their customary meeting time.

Mrs. F. W. Bailey whose home is in Portland, arrived yesterday to visit Mrs. E. W. Wallace at her home, 1650 B street. Mrs. Bailey and Mrs. Wallace are former college friends, having attended McMinnville college at the same time. Mrs. Bailey expects to remain in Salem about a week.

Mrs. Annie E. Pierce and daughter, Miss Bertha E. Pierce, of Los Angeles and Portland, have returned to Portland after a short visit with Mrs. E. H. Choate. They are Mrs. Choate's mother and sister.

Mr. and Mrs. Tom Cronise of 193 North Commercial, accompanied their son, Harry, to Portland Sunday. He left Portland Sunday evening for Bremerton as he has enlisted in the naval reserve. Mr. and Mrs. Cronise remained over for a short time to visit with their son, Ralph, who is now living in Portland.

Miss Ola Clark, daughter of Mr. and Mrs. Chester Clark, will leave soon for a vacation in southern Oregon. She is a graduate of Oregon Agricultural college and is planning to visit one of her college friends, Miss Wilda Counts who lives in Grants a few days.

Mr. and Mrs. Merlina Harding, 985 North Summer street, left recently for Newport. They have taken one of the Sea Crest cottages and will be gone for some time.

supreme court ticket. Lively fights are presented for the republican nominations. Former Governor Frank B. Willis wants to "come back" and win the republican nomination for governor. He has two opponents—Edwin Jones, of Jackson, his former campaign manager, and "Jack" Arnold, of Columbus, his former lieutenant governor. The main battle is believed to be between Willis and Jones.

There are eight republican candidates for lieutenant governor, five for secretary of state, one for state treasurer and five for judges of the supreme court.

There are, altogether, 77 republican and democratic candidates for Ohio's 22 seats in congress.

Westminster Abbey Struck By Bomb

An Atlantic Port, Aug. 13.—Westminster Abbey was struck squarely by a bomb dropped during a Zeppelin raid over London August 1 but the bomb failed to explode, according to Norman G. Hart an Englishman arriving here today on a British steamer. Five Zeppelins participated in the raid Hart said, two of which were brought down in flames.

EDDIE RICKENBACKER TELLS STORY OF LIFE

Sausage Strafing Party As Much Fun As Real Fight With Hun Aviator

(Copyright by the United Press.)

With The American Airman In France July 10.—(By Mail).—A sausage strafing party is about as much fun as a real Hun fight among a bunch of aviators. Our last one was a decided success. We followed the plan of searing Hefain to death," said Eddie Rickenbacker, all-American ace and erstwhile auto racer.

"This was an organized strafing party and was extra on our bill along the front. We did it voluntarily, and for the fun of it. It wasn't exactly work. We organized the strafing party into two groups. One started out early and got a high altitude by flying back and forth twenty minutes or more before the second group started. That first group was the strafing party.

Then the second party went up and crossed the lines at a low altitude. The Germans were evidently surprised. Their astonishment turned into amazement when the low-flying group of Americans began doing stunts right over the German guns, loops, slide-loops and all safe stunts.

"It was as big an insult as the German mind could stand, and they turned loose with a vengeance. Black puffs were all around us, but we kept on with motors at full speed, diving, looping, and making them still madder.

"Meanwhile the group which went up first, crossed the lines at a high altitude with motors shut off, gliding along. They were unnoticed on account of the racket of the motors of the stunt group, and succeeded in getting positions above half a dozen balloons before Heinie was the wiser.

"Then they dived, each man straight for a balloon, shooting as he came, the guns being loaded with incendiary bullets.

"One of every sausage there came an observer hanging on a parachute and the machines on the ground frantically inhaled in the boche sauges. The whole flock of American planes sped across the lines, having cleaned the sector of German balloons with one general dive.

"Heinie won't forget that little surprise party for a while. As a general rule the German aches are more to scare you than to bring you down." It is the shots from an opponent that are most dangerous.

"We have become used to having them pass around us, and a gimper usually isn't scared by puffs around him or the explosions though machine gun bullets from a German plinking party are no joke.

"There is one gimper in the crowd who is the most punished of us all. He never fails to draw fire, for some reason or other. He has rather poor eyesight and can't see the boches in time. As a result they're always plinking on him.

"One day he came down with seven bullet holes in his fuselage, and another through his boot. Another nicked his rudder controls. When he landed, he jumped out of his plane and hopped around like a chicken to see what damage was done the plane, thinking nothing about himself.

"Just then an alert came in. He jumped in his plane in a jiffy and about

RESIGNS SEAT IN CONGRESS THE MARINE CORPS—First Lieut. Edwin Denby has resigned his seat in Congress to enlist as a private in the Marine Corps. Denby who was a member of Congress from Michigan is now stationed at Paris Island, S. C., where his promotion has been rapid. Although 48 years of age Lieut. Denby feels fit enough to join the hardest fighting branch of the American Forces.

Personnel Board To Select Y. M. C. A. Secretaries

Jim Palmer, well known in the city for his work in connection with the Y. M. C. A. both here and over there, was in the city yesterday assisting in the organization of a personnel board of the Y. M. C. A. for the selection of secretaries for over-seas work. Mr. Palmer is secretary of the board for Oregon and Idaho. Hereafter, those who expect to go into the Y. M. C. A. work as secretaries will first be called before the personnel board in the city and this board will pass on the applicant's fitness and so recommend to the higher boards. By this means it is thought there may be quicker and more sure action in getting Y. M. C. A. secretaries into service in France.

The Board as appointed yesterday will be constituted as follows: Rev. R. N. Avison, chairman; O. B. Gingrich secretary; A. A. Lee, W. M. Hamilton, W. H. Trindle, W. J. Staley and Rollin K. Page.

Mr. Palmer is just home from France and he confirms the general opinion that the French children are most beautiful and artistic in appearance and that the American soldiers are having a great time entertaining the mand watching them and teaching the youngsters language as it is used in America.

McAdoo Advocates Railroad Electrification

Washington, Aug. 13.—Advocating electrification of all American railway lines as the cheapest transportation power, Secretary McAdoo today returned to his varied duties after two months travel for his health.

McAdoo stated his western trip convinced him that "if the government had permanent control of rail lines, electricity would be used as motive power in every instance where it could be obtained."

He added that the problem of developing electricity by water power was one of the most important in the nation today.

The secretary's first official statement forecast overwhelming success for the fourth liberty loan.

"America is in the best condition she has ever been to meet the war's financial demands," the secretary said. "Her crops are excellent. There are ample funds in every community to move them and if the money is not there the government will see that such funds are available."

Revenue legislation will require the secretary's immediate consideration, he said.

DESTROYER SUNK

London, Aug. 13.—A British destroyer, damaged by a collision was sunk by a submarine in the Mediterranean on August 6, the British admiralty announced today. Seven lives were lost.

A Strange Fact About Indigestion

A strange fact about indigestion with which comparatively few people are acquainted, is that nine times out of ten pain in the stomach after eating is due to food fermentation and acidity; which, as any doctor or druggist can tell you, is almost instantly relieved by taking a teaspoonful of pure Bi-nocla (powder form) in a little hot water immediately after eating or whenever pain is felt. Pure Bi-nocla is obtainable of druggists everywhere and if everyone would adopt this simple plan, indigestion, dyspepsia, sour stomach, gas and flatulence would soon be unknown.

Torpedo Missed Ship But Came Back Again

An Atlantic Port, Aug. 13.—Captain George Hansen, of the steamer Somerset, sunk by a submarine off Fire Island, declared today that he believed the queer antics of the torpedo before it struck its mark, were due to hitting something in the water, which deflected it from its course. He asserted that the torpedo, after missing his ship, and going by, came back and struck his vessel. It was suggested that the torpedo might have been controlled by wireless, as has been experimented with in this country.
