## BELIEVE SUBMARINES

(Continued from page one)

Officials here are at a loss, however to explain why the submarine officer was permitted to escape.

At least three of the large type submarines reached this side of the Atlantic it is believed. They are about 300 feet long and carry two guns and a score of torpedoes. One was equipped to cut cables. These undersea raiders have a cruising radius of 17,000 miles and are probably able to stay out longer by taking supplies from vessels they attack. Mines scattered by the U-boats are believed to have sunk the armored cruiser San Diego and several merchant vessels.

Germany probably has 160 to 180 U-boats in service now. Estimates here agree with those of Lloyd George that about 150 submarines are definitely known to have been destroyed. It is possible that actual sinkings have reached the 300 mark, although there is no positive proof as to at least 50 of these alleged sinkings.

Before the war Germany had 150 U-boats.

## EMPEROR KARL

(Continued from page one)

"It will chain his destiny to Ludendorff and will seal the fate of himself and the people forever."

From Vienna, it is reported that Karl is worried and doubtful whether the people and the army will submit tamely to German demands.

The Germans are now scraping up every man possible in the back areas for fighting, replacing hitherto unfit men in auxiliary work by girls.

## German Command Admits It Has Lost Supremacy in Air

Washington, Aug. 20.—The German command admits the loss of their supremacy, entente military advisers from France stated today.

Official military documents taken from German prisoners and bearing the seal of the German command, mentioned the lack of sufficient air facilities to cope with the French, British and American air forces, and ordered infantry units to stop appealing to the aerial command for protection against air raids, but to combat the raids with machine gun fire and anti-aircraft artillery.

French aviation casualties for July show the French losses against Germans were one half that of the Germans in the airplane operations and one third the total German balloon losses.

The document disclosing the German

## SOCIETY

By MABEL GARRETT

All of the maids and matrons of the society are busily engaged this afternoon with the many booths and attractions they have prepared for the Belgian Fete which is being given this afternoon and evening to raise money for the Belgian relief fund. For those who appreciate the aesthetic, there is a fascinating Japanese tea garden with suggestive wisteria blossoms and Japanese maidens, while the "boys of plenty" "grab bags" and fortune tellers will satisfy the fun-loving instincts of everyone.

Pretty little folk dances will be given tonight by tiny people dressed in bewitching costumes under the direction of Mrs. Ralph White. Besides the eight little girls representing butterfly who will fit in and out among the trees in a folk dance there will be a Spanish dance by two children, Genevieve Barbour and Henry Thielson, and a sunbeam dance by little Mildred Roberts, dressed in yellow with maline bows and glistening with bright sparkles. The little people in the butterfly dance are Genevieve Barbour, Marshall Shipp, Dorothy Livesey, Nancy Thielson, Helga Meyers, Madeline Brown, Berna Edwards and Mildred Roberts.

Miss Lena Johnson and her sister, Mabel, have returned from a vacation of several weeks. They visited relatives near Eugene.

Last week among those returning from their vacation were Dr. and Mrs. W. H. Darby and daughter, Helen, of 844 Center street. They motored to Rockaway, one of the Tillamook bays, where they had a cottage for two weeks. They were accompanied by Mrs. Darby's parents, Mr. and Mrs. W. B. Duncan of 1165 South 12th street Mr. and Mrs. Henry Cross of Vancouver were also in their party. Mrs. Cross is a sister of Dr. Darby.

Mr. Arthur Rand is spending her vacation at one of the Tillamook beaches with Portland friends.

Mrs. Fred Thompson and little son, Frederick, returned the latter part of last week from a visit with Mrs. Thompson's parents, Mr. and Mrs. Emmel, of Sherwood.

Many Salem people have been attracted to the Tillamook beaches this summer. There are several people who are now enjoying an outing at Ocean Lake. Among them are Tom Albert and daughter, Clara, Mrs. Robertson, Mrs. C. Purdy and daughter, Edna, Mrs. Charles Grant and two daughters, Marjorie and Dorothy.

## Attending to Chickens And Garden

"My neighbors are surprised to see me looking so well, for they thought I would not live to see summer. I had such pain around my heart as to cause me to faint. I knew it came from blunting and pressure of gas in my stomach. A friend in St. Louis told me to use Mayr's Wonderful Remedy and I now feel better than in all my life. I am doing my own work, attending to my chickens and my garden and have cleaned house." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convulse or money refunded. J. C. Derry, Capital Drug Store and druggists everywhere.

Inferiorly pointed out that "our resources are already so exhausted by observation duties that they are not sufficient to give chase to enemy aviators carrying out reconnoitering flights over our positions."

OVERSEAS BLUE OR SATIN FOR THIS SEASON'S WEAR.—The gowns this season will have smart distinctive lines and military braid trimming of black satin. The girle of the one pictured is hood with overseas blue. Underwood & Underwood.

## President Takes On Weight While Resting Eats Lots of Sea Food

Magnolia, Mass., Aug. 20.—President Wilson has gained weight on his war vacation. Declaring it unusual for a man of the president's age to put on weight in so short a time, Rear Admiral Grayson, the president's physician, has expressed himself as delighted at the change since President Wilson came here.

There is no doubt that the president and Mrs. Wilson have enjoyed every minute here. Magnolia residents today amused themselves by making up a statistical table, showing how the president has spent his time. Up till yesterday he had been here 108 hours.

Automobile 24 hours; walking five hours; working ten hours; golf five hours; reading three hours; meals 12 hours; idle 15 hours; sleeping 34 hours. The president has motored a total of 500 miles. Although he has been out in the open at least 12 hours a day he has walked only about ten miles.

The idle hours, includes time spent on the veranda after meals, talking with Colonel Lynch and other friends.

One of the things the president has enjoyed most is the sea food. Fresh fish have been served at the president's table at almost every meal. Lobsters have been bared from the president's table as being too rich. The president and Dr. Grayson are expected to make a second round on the Myopia Hunt club golf course today. They played a tie score there, Friday.

## DRAFT BILL WILL BE

(Continued from page one)

ing discussed in the house. With an agreement to reconvene the senate Thursday to consider the man power bill, many senators today believed the measure could be disposed of by Saturday night.

Even if no vote is obtained by that time, the bill, in all probability, will have the right of way the following Monday. Prohibition senators are unlikely to insist the "bone dry" measure be considered first, although that is the unfinished business by agreement.

One of the most prominent of the "dry" leaders today said he would be willing to set aside the amendment temporarily to insure the quick passage of the man power bill. His views are believed to represent those of the majority of the prohibitionists.

## SALEM BOY

(Continued from page one)

not see land again or get out of the destroyer for 28 days. The submarine chaser is 100 feet long and all of the engines are installed in an engine room 9 by 15 feet with a deck so low that a tall man cannot stand upright. In a choppy sea, this racer of the seas rolls from 15 to 20 degrees and the engineers are obliged to sit on the floor and slide from place to place in operating the machinery. At night they are strapped to their bunks to keep from rolling out onto the deck. When the Salem boy made his first trip on the chaser conveying a troop ship a submarine was located by the hearing device and depth charges were heeled overboard. What effect that had on the submarine was unknown but the boat with great difficulty got into port to be at once placed in dry dock.

## APPROVES WAGE INCREASE

Washington, Aug. 20.—Postmaster General Barlow has announced he had approved the wage increase given by the Western Union Telegraph company to its employees. Barlow said the increase was not discriminatory in any manner, that negotiations were under way for the increase at the time the government took over wires and they had been submitted to him and now were approved "after very careful consideration."
