

REMININGTON UMC

Wetproof Steel Lined Shot Shells

MAKE your showery hunting days this Fall the good days for ducks they really ought to be, with the right shotshells—Remington UMC Smokeless "Arrow" or "Nitro Club" Wetproof Steel Lined "Speed Shells." No matter how much water may get to them, they will actually stay just as dry and serviceable as your Remington UMC Pump Gun or Autoloading Shotgun.

Those finest of above-water fowl, the big mallards—which you can seldom get with-in gunshot of when it is calm and fair—are then not so quick to take wing. But your shells must be right. Hunting has no worse luck than a water-soaked shell that has swelled and sticks in the gun at a critical moment—to say nothing of a "miss" caused by wilting of the turned-over end of the shell.

Remington UMC Smokeless "Arrow" and "Nitro Club" Wetproof Steel Lined "Speed Shells" are made waterproof by a wonderful process, invented for them and used exclusively in their manufacture.

It took three years to perfect this process. The result is a shell that will work and shoot right throughout an all-day downpour—keeps hard and smooth with no softening of the turned-over end or bulging of the top wad in the wettest coat pocket.

Remington UMC
for Shooting Right

You buy the same favorite brand, at the regular price, and get the Wetproof improvement without cost. The first completely waterproof shotshell, at the same time having the uniform superiority of speed, pattern and penetration for which Remington UMC "Arrow" and "Nitro Club" Steel Lined "Speed Shells" are famous.

In black powder, buy the old reliable "New Club," now Wetproof sealed at turnover and top wad.

NATIONAL ASSOCIATION OF BASEBALL LEAGUES

Meeting At Peoria Will Be Most Important Gathering In Years.

Auburn, N. Y., Oct. 9.—The National Association of Professional Baseball Leagues will meet beginning November 12, at the Jefferson hotel, Peoria, Ill. It was announced here today by M. H. Sexton, president.

The announcement declared the forthcoming convention probably will be the most important ever held by the association. Preservation of territorial franchise rights, purely an internal affair of the national association; mutual respecting of player reservation rights and many other important affairs Sexton stated, will be taken up.

"The interests of all can best be safeguarded by attendance," he said.

Battler Seriously Ill

Chicago, Oct. 9.—Battling Nelson, seriously ill here in a hospital with Spanish influenza is flat broke.

The former lightweight champion boxer, who in his palmy days was wealthy appealed to his friends today for aid.

"I am not asking charity," Nelson said. "All I want is the return of some of the \$250,000 I loaned friends in the days when I had plenty."

The Durable Dan, said his father had tied up all his property at Hegewisch, Ill., and refuses to aid him. He has not enough to pay his hospital bills, he said.

Nelson is threatened with pneumonia.

This first meeting was The Care and Renovation of Clothing. Miss Mills also demonstrated the adaptation and alteration of patterns. A number of interested women made up the class.

The new auto bus has arrived and is now doing duty between Monmouth and Independence, carrying passengers and mail and meeting all trains. The bus has a capacity of 18 persons, and the driver behind used to carry the mail and small baggage. The bus is owned by Graham and Son, and Irwin Stewart is the driver. The new service is very convenient and satisfactory.

Monmouth is represented in the S. A. T. C. at the University of Oregon by Hjalmer and Ernie Gentle, Donald Portwood, George Walker, Robert Henderson and J. B. V. Butler, Jr., and O. A. C. by Duane Moore, Willie Harvey, Burton Bell, Willie Crabtree, Maxwell Howersox and Delbert Steuch.

Although Monmouth is not yet "over the top" in the Fourth Liberty Loan drive, subscriptions are still coming in and it is expected that the full quota of \$24,000 will be raised within a few days.

In a recent letter from Charles Powell to his parents here, Charles states that he is getting along nicely. He is wearing a specially made shoe on the crippled foot and is able to walk about some without the aid of his crutches. Charles has been confined to the army hospital at Fort Sam Houston, for several months.

Mr. and Mrs. D. M. Calbrath exhibited some of their blue Andalusians at the state fair and carried off all the honors, offered in this line.

Earl McNeil left Thursday night for Dallas where he joined others in the selective draft, who left at once for Ft. McDowell, California.

Sho filling is over a month earlier in this vicinity than usual. Some of the farmers who have tractors are busy with fall plowing and those who must depend on horse power are hoping for rain as it is much too dry at present to plow by this method. Many wells are dry and getting sufficient water for stock is a problem for dairymen.

Extra Cost for Quality? No, Sir!

You'll likely find it costs you even less to chew Gravely. It goes further. You only need a small chew of this class of tobacco, and it holds its good, satisfying taste a long, long time.

It goes further—that's why you can get the good taste of this class of tobacco without extra cost.

Stomach Dead, Man Still Lives

People who suffer from sour stomach, fermentation of food, distress after eating and indigestion, and seek relief in large chunks of artificial digestors, are killing their stomachs by inaction just as surely as the victim of morphine is deadening and injuring beyond repair every nerve in his body.

What the stomach of every sufferer from indigestion needs is a good prescription that will build up his stomach, put strength, energy and elasticity into it, and make it sturdy enough to digest a hearty meal without artificial aid.

The best prescription for indigestion ever written is sold by druggists everywhere and by Dan'l J. Fry and is rigidly guaranteed to build up the stomach and cure indigestion, or money back.

This prescription is named Mi-o-na, and is sold in small tablet form in large boxes for only a few cents. Remember the name, Mi-o-na stomach tablets. They never fail.

WHY PAPER MUST BE SAVED TO AID IN WINNING WAR

Paper contains valuable chemicals necessary for war purposes. Economy in the use of paper will release a large quantity of these materials for making ammunition or poisonous gases.

Paper making requires labor and capital, both of which are needed in war service.

Paper making requires transportation space. Economy in the use of paper will release thousands of freight cars for war purposes.

Greater care in the purchase and use of paper will save money. Your saving will help finance the war.

Strictest economy in the use of paper will prevent a shortage.

WAR INDUSTRIES BOARD.

WHY YOU MUST SAVE PAPER.
The government wants and must have the materials used in making paper such as pulpwood, sulphur, bleach, and labor. Man power is needed on the western front to win the war; chlorine employed in bleaching the paper—it is necessary in the manufacture of poison gas; fuel for our war industries is needed—there will be a coal shortage from 50,000,000 to 60,000,000 tons. A saving of 25 per cent in the use of paper will release for war industries 2,500,000 tons; sulphur is needed—if you waste paper, there will not be enough to supply both the government's needs and the paper manufacturers'. Wasting paper—burning it up or dumping it into the sea, keep—is to destroy its value. Waste papers, newspapers, magazines, "old paper", is converted into packages for shells, packages for sending material and munitions abroad, into paper again for our own use. Every sheet of waste paper must be saved that it may be used over again—perhaps for letter paper that the boys over there may write to their mothers, sisters, sweethearts. Every sheet of paper that we refrain from using, that we use economically that we save; every bit of wrapping paper, box, bag, etc., is necessary, vital and essential to help win the war, and to help keep supplied our great paper industries at home.

THE IMPORTANCE OF SAVING WASTE PAPER.

Waste paper of all kinds can be used in making new paper or paper boards. All the chip board from which ordinary pasteboard boxes are made is manufactured out of mixed waste paper scraps gathered up in the stores and other places. Newspapers make a better grade of board known as news board. Strong wrapping papers, mixed with sulphate pulp are used in making test or strong chip board from which shipping containers of all kinds are made. These are taking the place of wooden boxes, thereby conserving the forests.

The fewer grades of waste paper such as magazines, books, stationery etc., are sorted out, reinked, and used again in making books, writing and other grades of paper. In making of bonds and ledgers, etc., a considerable quantity of rags is necessary, the supply of which is becoming very scarce and it is imperative therefore, that all old rags be saved. Every household should save all of its old paper and rags as well as old rubber, leather, etc. and dispose of them to the school children, Red Cross, Salvation Army, junkmen, or other collectors, so that the supply may be kept adequate to meet the demands of the government and other essential uses.

MONMOUTH NEWS

(Capital Journal Special Service.)
Monmouth, Ore., Oct. 9.—The Monmouth canning team consisting of Bertha Ostrom, Fannie Steinberg and Una Winagar, won third place in the canning demonstration at the state fair.

Monmouth high school has a much better registration this year than last. Quite a number of the older boys have registered for the student army training corps at O. A. C. and U. of O. and several girls, and boys are working in the prune orchards but will register later.

Miss Edna Mills, home demonstrator for Polk county, held a meeting in the I. O. O. F. hall Saturday afternoon. This was the first of a series of meetings scheduled by Miss Mills, the purpose of which is to demonstrate improved methods and short cuts in home work. The main topic for discussion at

JUNIOR RED CROSS AT MONMOUTH NORMAL

A Junior Red Cross course will be given at the normal school beginning this week. The chapel period for the past week has been given over to explanations and to outlining the work. On Monday Miss McIntosh told of the splendid work done last year by the children of the training school and explained all about the junior organization. On Tuesday Miss West occupied the hour, emphasizing the importance of publicity work. She advocated doing the world know what you are doing and mentioned ways and means of getting the work before the public, chiefly as an inspiration to others. Miss Chase spoke Wednesday, outlining the course the home economics department will give to teachers who wish to prepare themselves to do this work in their individual schools. Thursday Miss Taylor occupied the time telling of the physical training course which would be given, under which head would come "first aid" instruction which is most important, either in times of peace or war. On Friday Miss Parrot closed the series with a talk on "Patriotic Literature" and "Programs," in which she stressed the importance of seeing that young people are provided with patriotic reading, and programs and entertainments put on by them are of a patriotic nature. This war course which has just been added to the curriculum is certain to bring about a great amount of good.

Private Peat will speak in the normal auditorium on Tuesday, October 15. The normal auxiliary of the Red

The Ladies will be interested--

TO KNOW THEY CAN BUY THE POPULAR Red Cross Shoe which combines exquisite beauty of form with delightful comfort and satisfactory service. They are not expensive either.
