To The Voters On Unpaved Streets.

The City of Salem has today, approximately 36 miles of hard surfaced streets, including both paved and macadamized roads. About 75 miles of Streets have no class of improvement whatsoever. If the "Richardson Amendment" should carry it would double the present tax of every resident of the city, both those on paved streets and those on streets unpaved, to pay for the pavement now laid. If you live on a mud road and are paying for the pavement in front of the residence of a man residing on Court street, are you not as much entitled to have your London, Nov. 1.—The Austro-Italian Street paved as he is to enjoy the benefits of the one laid armistice has not yet been signed, but an agreement and signatures are expected momentarily.

Street paved as he is to enjoy the benefits of the one laid past his property? If it will double your taxes to pay for perform momentarily. the pavement now laid what chance do you think there will be to get the tax payers to again double their taxes to pave your mud road?

Every thinking man knows that there is none. The proposed amendment is full of injustice but to the man on an unpaved street the injustice is greater than to anyone else. Don't be deceived by false promises. If this measure is adopted the man on an unpaved street makes the Italian of himself a "mud hen" perpetually while his neighbor on aristocratic avenue rides over his pavement at the mud hen's expense. If you have something to donate give it to the Red Cross or some other war activity but don't donate to the man who does not need it and tie your own hands so that your street can never be improved.
