

### Thirty Feet of Danger.

The intestinal canal is an important part of every individual, important every inch of its thirty feet. The upper portion of it is intended for the digestion of food and absorption of its useful portions. But the lower part is concerned with the elimination of waste material.

It is, in other words, the great sewer of the body. The more food eaten, the greater the waste. If a sewer becomes clogged up, its contents stagnate and become more and more dangerous.

Constipation means more than failure to evacuate the bowels regularly and thoroughly. It means stagnation, increased fermentation, putrefaction and germ action. Increased amounts of irritating and poisonous substances are formed. Absorption of these into the blood follows. Self-poisoning results.

Danger, disorder, disease, or even death follow.

Pills, purgative mineral waters, castor oil, salts, etc., do not cure constipation or prevent its consequences. They make it worse because they do not only irritate the bowels, but they "wear out" in effect and so must be taken in increasing doses, making constipation a habit.

But the Nujol Treatment for Constipation overcomes constipation by helping Nature re-establish easy, daily, thorough bowel evacuation as "regular as clockwork."

Nujol prevents stagnation and self-poisoning.

Nujol forms no habit, except a natural, healthy habit.

After Nujol has trained the bowels to act, it can be dispensed with.

### Crazed With Enthusiasm.

With the flash over the special wire into the Capital Journal office that the armistice had been signed and the war was over, Salem went wild with excitement.

Within a few minutes after the notice was posted on the bulletin board, the news spread like wild fire throughout the city. First was the sounding of whistles, then the chiming of the church bells and then the loud clamor of the fire bell, announcing to all that something tremendous had happened.

For once in its sedate life the city of Salem went wild. There was no such thing as business. Within a few minutes after the news was confirmed, business houses began closing and every body, both men and women were on the streets blowing horns, repeating in the wonderful news.

At the state house excitement reigned supreme. Everybody laid aside the work of the day and a parade was soon formed by state house employees. These were joined by the students of Willamette University and the student army training corps, all adding their share to the general rejoicing.

As boys with loud horns were soon flying about in autos, people began to stream down town, all eager to hear the tremendous news. Auto horns and thousands of loud patriotic tin horns were distributed and among those participating in the hurrah were the young women, anticipating the return of the boys over there.

A parade two blocks long was formed in the business district. The flag of the armory was carried by a dozen enthusiastic young girls marching in the parade. Firecrackers reminded the older ones of the famous old-time Fourth of July celebrations. Boys ran about firing blank pistols. Delivery wagons with tooting auto horns added to the general excitement.

Never in the history of the city has there been such a spontaneous outpouring of the citizenship. The town simply went wild. Telephone operators were simply buried in the avalanche of calls, all demanding immediate information as to the ringing of the bells and shrieking whistles. One drygoods store as soon as the news was confirmed, put out the sign "This store is closed all day for the biggest day in its history."

Within half an hour of the issue of the Capital Journal special announcing that the fighting would stop at 2 o'clock today and that the Americans had taken the famous city of Sedan, hundreds of flags were flying from every office and business house in the city. While the S. A. T. C. boys were
