Catarrh Of The Stomach Is Dangerous

"Thousands Have It and Don't Know it," Says Physician. Frequently Mistaken for Indigestion—How to Recognize and Treat.

"Thousands of people suffer more or less constantly from furred, coated tongue, bad breath, sour burning stomach, bitter eructations, gas, wind and stomach acidity and call it indigestion when in reality their trouble is due to gastric catarrh of the stomach," writes a New York physician.

Catarrh of the stomach is dangerous because the mucous membrane lining of the stomach is thickened and a coating of phlegm covers the surface so that the digestive fluids cannot mix with the food and digest them. This condition soon breeds deadly disease in the fermented, unassimilated food. The blood is polluted and carries the infection throughout the body. Gastric ulcers are apt to form and frequently an ulcer is the first sign of a deadly cancer.

In catarrh of the stomach a good and safe treatment is to take before meals a teaspoonful of pure Bisurated Magnesia in half a glass of hot water as hot as you can comfortably drink it. The hot water washes the mucous from the stomach walls and draws the blood to the stomach while the bisurated magnesia is an excellent solvent for mucus and increases the efficiency of the hot water treatment. Moreover the Bisurated Magnesia will serve as a powerful but harmless antacid which will neutralize any excess hydrochloric acid that may be in your stomach and sweeten its food contents. Easy, natural digestion without distress of any kind should soon follow. Bisurated Magnesia is not a laxative, is harmless, pleasant and easy to take and can be obtained from any local druggist. Don't confuse Bisurated Magnesia with other forms of magnesia, milks citrates, etc., but get it in the pure bisurated form (powder or tablets), especially prepared for this purpose.

All Sorts Of War Books Now Ready At State Library

Almost with the signing of the armistice, historians were ready with a complete history of the great war. For as soon as America entered the conflict, the National Board of Historical Service, began preparing materials as the war progressed.

In order that schools may be fully supplied with a story of the war, Miss Cornelia Marvin, state librarian, has been looking over the large number of books issued and is now ready to recommend three books, as follows: "A School History of the Great War," "The Little Book of the War," and "Nida's Story of the War."

Another book that has been issued under the direction of the national board for historical service, is entitled "Lest We Forget," which will be recommended by Miss Marvin.

Another book just issued and printed under the direction of the service board includes the best poems that have been written on war subjects and selections from the best books that have been issued.

However, while there is a great call for late war books, Miss Marvin says that from all parts of the state comes the insistent call for technical books. Not only men but women are reading books to improve themselves as a matter of education with the view of becoming more proficient in certain chosen occupations.

And while war books and technical books have the call, the iconoclast is coming along with proof of what really happened to the early settlers of America and these iconoclasts are sweeping away many of our cherished ideas, especially about the Pilgrim Fathers. These books tell what really happened and explode many of our wonderful fairy stories. But they may be had at the state library through the Salem public library.

THIS WILL INTEREST STOMACH SUFFERERS

Says Indigestion Comes From An Excess Of Hydrochloric Acid.

Rheumatism is no respecter of age, sex, color or rank. If not the most dangerous of human afflictions it is on of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensives, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lithia water drink which overcomes uric acid and is beneficial to your kidneys as well. 54

STATE HOUSE NEWS

In order to demonstrate by legal proceedings whether or not Governor Olcott can resign his office as secretary of state and name his successor, a friendly suit has been filed in the supreme court today, with the governor in the role of plaintiff and State Treasurer Hoff as defendant. As a means of "starting something" Treasurer Hoff held up the warrant for the governor's salary for the month of March. The next move was on the governor, who filed in the supreme court a petition for a writ of mandamus to compel the treasurer to issue said warrant, at the same time requesting that the court should define his duties and powers in the present situation. Out of the analysis of this case it is hoped to bring a decision showing that Governor Olcott may resign the office of secretary of state without jeopardizing his office as chief executive, and that he is also empowered to name his successor. Further than its importance in the present situation, in adding a third member to the board of control, this decision would establish a precedent for all such cases.

The state highway commission sees valuable supplementary aid in the prosecution of the state program in the work of the Roosevelt highway association, which is receiving enthusiastic backing from the coast counties, Clatsop having just raised $2500 for the fund. The organization of the association is now complete, with the following officers: President, S. C. Pier, Portland; vice president, Bruce Dennis, La Grande; treasurer, E. D.
