

When the Baby Needs a Laxative---

No one knows better than the ever-watchful mother—the natural doctor of the family in all the small ills—that when the baby is out of sorts it is usually due to indigestion or constipation.

It is always well, in any of its illnesses, to look for this cause. The diet may have to be changed, but before good can result from it, the bowels must be moved.

The mother has the choice of many medicines—cathartics, purgatives, bitter-waters, pills, physics, etc. But the little body doesn't need such harsh remedies for they wrench the system and do only temporary good, so often followed by an unpleasant reaction.

A better plan is to employ a mild, gentle laxative of which only a little is required. There is a combination of simple laxative herbs with pepsin sold by druggists under the name of Dr. Caldwell's Syrup Pepsin that thousands of mothers have used successfully for baby's constipation and its accompanying ills, such as belching, wind colic, restlessness, sleeplessness, etc.

The nursing mother will also find it ideal for herself, and it is especially important that she be free from constipation.

Syrup Pepsin is guaranteed to do as promised or the druggist will refund the money. Thousands of cautious families have it in the house, secure against the little ills.

Dr. Caldwell's SYRUP PEPSIN The Perfect Laxative

PRICE AS ALWAYS

CITY NEWS

If any member of the Commercial happens to have several brilliant ideas as to how things should be run in the city, he will be most welcome at the meeting to be held at the club rooms Wednesday evening at 8 o'clock. But he will be given only five minutes in which to tell all about it. The meeting of club members tomorrow evening is to be something entirely different. In the first place, there will be no plea for money, no hard times story nor will any collection be taken or anybody asked to subscribe for anything or will there be any tag day business. It's to be something different. J. Greenbaum, chairman of the social department, has arranged a program of entertainment which is to follow the preliminary speaking. These preliminary talks are on a basis of five minutes and the speaker is to sit down when the gong rings. It is expected that at least a dozen or more speakers will have something on their chest which they are willing to talk about. After the speeches there will be the entertaining feature and then there will follow the luncheon, commonly called in Salem, a banquet. Preparations are being made to serve 150 as it is expected that fully this number will attend, if not from business motives, just from curiosity to find out what the new deal is.

For the Salem teachers who wish to attend the teachers' institute at Silverton next Saturday, instructions have been sent out that the auto stage will leave the court house at 8 o'clock. Those going by train will leave by the Southern Pacific at 9:12 a. m. and arriving at Silverton 10:30. The sessions will begin at 9 o'clock Saturday morning and close at 4:30 o'clock.

At a meeting of members of Hal Hubbard camp, Spanish War veterans, held last evening in the armory, preliminary arrangements were discussed for the state encampment of the Spanish War veterans and their auxiliaries. The encampment is to be held some time in June, although the exact date has not been named. It is understood that Governor Quinn has offered the use of the state chambers and that the auxiliaries will occupy the senate and the veterans the house of representatives. To arrange details for the encampment, the following executive committee has been named: A. T. Woolpert, James Chenoweth and Lester B. Davis. The auxiliary executive committee includes Mrs. Charles Wilson, Mrs. Robert Kuro, Mrs. J. D. Humphries and Mrs. Elbert Jarrill. On the reception committee are Mrs. Leroy Hewitt, Mrs. Grace Peterson, Mrs. Fred Thompson and Mrs. C. J. Lide.

WHEAT PRODUCTION

(Continued from page one) reporting board follows: "The condition of winter wheat in the United States April 1 is the highest ever recorded and the largest acreage ever planted in this country. The condition improved during the winter—unusual occurrence—due to the favorable winter weather, particularly to the absence of alternate freezing and thawing which appears also to have resulted in a minimum of winter killing.

Grain In Good Shape. "A striking feature of the present situation is uniformly good condition in practically all important wheat producing states, ranging from 104 in Ohio, down to 98 in North Carolina, among the 1,000,000 acres or more in crop. The lowest figure from any state was 80 in Wisconsin.

Kansas, with approximately eleven million acres out of the total of 401,000,000 acres shows a condition of 101. The present moisture conditions throughout the country with unimportant local exceptions, are extremely favorable.

"The condition of the crop is higher than has been reported on any April 1, since 1882. The indicated yield of 237,000,000 bushels is nearly double the yearly average production in this country for the five years before the war. It is also nearly 50 per cent larger than the production during the war years of 1914 to 1918. The indicated yield is higher in actual production than any year, with the exception of 1914, when the yield averaged 18.5 bushels per acre, on an estimated condition of 95.6 per cent.

HOW TO WAVE HAIR TO APPEAR NATURALLY CURLY

You won't need to resort to the parking, searching, curling iron if you will adopt the simple plan I will mention. Isn't that good news? At night merely apply a little liquid aloe vera with a clean tooth brush, drawing this through the hair, from root to tip. This will impart a delightful wavy appearance and a bright lustre suggestive of "hidden sunshine." It will prove beneficial to the hair, instead of making it brittle and dead looking as the hot iron does. In the morning, instead of your tresses being messy and contrary, you will find them quite easy to do up in any form, and there will be no unpleasant odor, grease or stickiness about the hair. I would suggest that you ask your druggist for the liquid aloe vera—four or five ounces—which will require no mixing and you can pour a little into a saucer when required.—Emily Coulson in Hygiene.
