CORNS PEEL OFF PAINLESSLY

There's Only One Genuine Corn Peeler—That's "Gets-It" There's only one happy way to get rid of any corn or callus, and that's the painless-peel-off way. "Gets-It" is the only corn remedy in the world

"Drops of 'Gets-It'—Corn is doomed."

that does it that way—effectively, thoroughly. Why get down on the floor te yourself up into a knot, and have to fool with "peppercorn" plasters, greasy ointments that rub off, sticky leppes, digging knives and scissors, when you can peel off your corn or callus in one complete piece, peacefully and surely, with magic, simple, easy "Gets-It"? It takes 2 or 3 seconds to apply "Gets-It"; you use 2 or 3 drops and that's all. "Gets-It" does the rest! Get rid of that corn pain at once, so that you can work and play without corn torture. Be sure to use "Gets-It". It never fails.

COURT SPECTATORS' HUNGER FOR SCANDAL IS FULLY SATISFIED

Stocker Trial Develops Interesting Testimony Regarding Defendant and Business Manager.

Los Angeles, Cal., May 27.—Walter T. McGinley, manager for Mrs. Clara Baldwin Stocker, was pictured today by Mrs. Albert E. Snyder of San Francisco, divorced wife of Mrs. Stocker's son, as an artful flatterer. He had worked his wiles, Mrs. Snyder claimed, with success on Mrs. Stocker. Mrs. Stocker's attorney, however, sought to soften the picture with the statement that McGinley had transformed Mrs. Stocker from a "hard drinker" to a "moderate user of intoxicants."

TOO SHARP FOR ATTORNEY

Los Angeles, Cal., May 27.—(United Press)—Mrs. Stella Snyder, pretty divorcee, continued her version of the affairs of Mrs. Clara Baldwin Stocker in court today. Mrs. Snyder was called as a witness at last night's session of Albert E. Snyder's petition to have his mother declared incompetent, after Mrs. Stocker had concluded her evidence in a burst of repartee and after Snyder had briefly testified.

Highballs Her Favorite.

Mrs. Snyder's testimony so far has dealt largely with charges by her that Mrs. Stocker drank to excess. "I think the drinking affected her mind," Mrs. Snyder told the court. "She would get up in the night and telephone all sorts of things to the hotel office. She stole all of my clothes and then gave me \$50 to come back to her when I left because I couldn't stand living with her."

for the four succeeding years—

so that the second year there will be 300 guardsmen per congressman, the third year, 450, the fourth, 675 and the fifth, 900. For the first year the divisions will be organized on a basis of 7,820 men to a division. There will be 24 coast artillery companies. New York's share of these will bring her total guardsmen to 9,500 the first year.

In the proposed divisional organization, there are expected to be one artillery and three infantry regiments to a division, with the fourth to be formed later. War department officials desire principally to assure strong organization so that units can be filled up later. Twenty-five states, Hawaii and the District of Columbia so far have been authorized to organize national guard units. They include California, Idaho, Oregon, Utah, Hawaii, Montana and Washington.

Among other matters to be taken up at the meeting of the highway commissioners in Portland today is that of the proposed post road between this city and Dallas. Should this be done, operations can begin on this line at once.

Contracts aggregating 129.80 miles of road work are to be passed upon by the meeting today, 38 miles of which is hard surface and the balance either grading or macadam. There is going to be "a long dry spell" at the Salem Kings plant this season, whatever the weather bureau says. The machinery has been set in operation this week, with about 80 people at work, beginning the long job of evaporating spinach, which is the first thing on the program out there. There is not enough of the product coming in as yet to keep the machinery constantly in operation, but it is expected that by the first of next week the crop will be coming in fast enough to keep a force at work continuously. Contracts have been signed up for 250 tons of spinach, 2100 tons of carrots, 2500 tons of squash, 1000 tons of onions, 700 tons of cabbage. It is anticipated that the early vegetables will keep the plant going until the fruit crop begins to come in, when the force will have to be doubled.
