### Don't Experiment with Catarrh; It Often Leads to Dread Consumption.

**You Will Never Be Cured With Sprays and Douches.**

Catarrh is a condition of the blood and can not be cured by local applications of sprays and douches; this has been proven by the thousands who have vainly resorted to this method of treatment.

Catarrh should not be neglected or experimented with. The wrong treatment is valuable time lost, during which the disease is getting a firmer hold upon its victim, and making it more difficult for even the proper treatment to accomplish results.

Though Catarrh makes its first appearance in the nostrils, throat and air passages, the disease becomes more and more aggravated and finally reaches down into the lungs, and everyone recognizes the alarming condition that results when the lungs are affected. Thus Catarrh may be the forerunner of that most dreaded and hopeless of all diseases, consumption.

No local treatment affords permanent relief. Experience has taught that S. S. S. is the one remedy which attacks the disease at its source, the blood, and produces satisfactory results in even the worst cases. Catarrh sufferers are urged to give S. S. S. a thorough trial. It is sold by all druggists. You are invited to write to the Medical Department for expert advice as to how to treat your own case. Address Swift Specific Co., 254 Swift Laboratory, Atlanta, Ga.
