## COUNCIL ELECTS TWO

(Continued from page one)

Just to stop paying interest, Alderman West moved that the city pay one of the \$1000 warrants held against the South Twelfth street paving. In this fund there is now \$1000. The \$1000 warrant has accumulated \$300 interest. It was voted to pay the warrant and take the additional money needed from the general fund. It seems that the city carries a heavy burden in its several funds and is also paying a heavy interest on its outstanding warrants and bonds.

There is considerable paying to be done in the city, but there is also a scarcity of labor. An effort was made by Alderman West to have some of this paving done, but Alderman Moore moved that no paving be done, at least not until after the meeting of the council August 5.

The people living on Front street two blocks north and two blocks south of Market street, in the neighborhood of the King's Products company petitioned for the closing of Front street on the four blocks. There is a rather heavy traffic and a lot of dust floating. It was also suggested that Court street between Front and Commercial should be closed. Alderman Vandevort said he didn't think it so awfully dusty. The petition was laid on the table.

City Attorney Macy wanted to know from the council what to do with the deed given by Spaulding for the strip of land on the river front beginning at the point where the south side of Court street is sold into the river, extending north to the big bridge. This river front was given the city when the paper mill interests were voted the vacation of the river street. The council came to the conclusion that the best thing to do would be to have the deed recorded. This was now a sole record of \$10 a month. This was the amount Mr. Denison was paying Spaulding for the rest of some river frontage and the city gets it—in fact has already got the first month's payment.

There is really a need of some alarm system at Capital and Union streets and although the public service commission sided with the Southern Pacific when the city attempted to secure a signal system, the city aldermen were inclined to take the matter up in the circuit court. City Attorney Macy seemed to think the Southern Pacific was too strong for the city in a law suit and said there was no use in going near court. But the aldermen expressed their opinion that Capital street where the S. P. crosses is a dangerous place. The city park board asked for some money as some time ago the council voted that instead of using its appropriation when wanted, it must come to the council. There was inclination to ask what the board did with its money and later an inclination to accept its annual report, as in the past.

Alderman Vandevort introduced an ordinance providing for the appointment of a purchasing agent for the city, to serve at the rate of \$50 a month. City Attorney Macy said the ordinance was legal. It was referred to the ordinance committee.

'You could walk back under the falls, in that lava cave, for several hundred feet,' enthused Phil, 'and there were dozens of side excursions in the form of smaller caves. Go there by way of Silverton and take the north side of the creek to the north falls. It's one of the most beautiful sights of Oregon. And there are trout there, too—big fellows—I could see them swimming around.'"

made despite the fact that it has been one of the driest years this section has known. A great acreage was devoted to grains.

"Washington has one of its biggest crops of wheat this season," says the Journal. "It has the best average quality known. The state has an estimated production of 39,565,000 bushels, or one of its greatest outputs. As usual Whitman county is the big producer of not only the state of Washington, but the biggest county west of the Rocky mountains. The production for the year is estimated at 11,000,000 bushels."

The Journal predicts that Oregon will raise 21,225,000 bushels of wheat.

"Of chief importance," says Cohen, "is the fact that the Willamette valley has come back. It is again a real producer of wheat—some 3,350,000 bushels being the estimate for this season."

The Journal declares that Idaho has only a fair crop of wheat. "Southern Idaho has been famished for ruin," says the Journal, "and the production there is exceedingly small considering the immense increase in the area planted. Up around Lewiston, through the Camas and Nez Perce sections, and on

## My Baby's First Summer

WHEN the days and the nights began to be hot and sultry, my baby began to droop. He lost a little weight and he was fretful at night—he who had always slept so well.

I thought a baby properly cared for should be as well and as happy in summer as in winter, so I asked my doctor.

"Why, of course," he said, "We'll give him Nestlé's Milk Food."

So now I know I don't have to be afraid of hot weather. With plenty of cool baths and light enough clothing, and with Nestlé's digesting easily in that little stomach, my baby goes happily on to health and strength.

Nestlé's is just pure milk in
