How Much More Tobacco Will My Heart Stand?

A Vital Question for Every Man Who Smokes or Chews to Answer.

May Cost a Life to Pind Out

May Cost a Life to Pind Out

By Experiment

The heart of every user of tobaccubears a double burden. It does its allotted task and then fights nicotine
for supremacy. As long as the heart
wins he lives; when it loses he dies, but
before the final victory of nicotine
you pass through many stages of dechine and decay and suffer many pangs.
Hearts are like human beings—some
are stronger than others, therefore
some hearts will stand more tobacco
than others, but there is a limit to
what any heart can stand. The man
who puts this additional strain on his
beart a dozen times a day by smoking
eigarettes, a pipe or eigara—or chewing tobacco—is taking a madman's
chance with health and life to lose
and nothing to win but the chance that
he may lose them He is indulging in
a costly habit at the expense of pretions health. Ask any doctor anywhere,
and he will tell you that using tobaccois injurious and that it is far better to

and to really quit takes more will pow-

singurious and that it is far better to find out how much tobacco your heart will stand without serious results.

But the thought of quitting is unpleasant to most men—even to those who know that tobacco injures them—

LIGHTNING STRIKES

Eugene and other points in the William bolt of lightning struck the steel bridge here, putting it out of commission. An other splintered a flagpole just as a

steeplejack was preparing to paint it.

The rain fell in torrents for a short period. Then the clouds cleared away.

Vessels in the Willamette were forced to remain at their berths. The lightning damaged the bridge's electrical mech-anism. It flashed down to the bridge pavement and consumed a pile of briq.

H. E. Henry who was preparing to paint the flagpole lest his job. "It's a hunch for me to quit the business," he said.

BRYAN HEADLINER

Whitney, who is in a class by himself Whitney, who is in a class by himself in rapid-fire impersonation presented the finest type of monologue ever heard in Salem. A chameleon would have gone paralytic in the attempt to follow Whitney in his lightning changes from a gushy, eachling old maid to a "roughneek" just out of Sing Sing. The play 'Turn to the Right' is equally divided between language and tears and

bess the date on the calendar, with the Recital Artists, Mary Adele Huyes and Elsie Mae Gordon furnishing music and impersonations and with Bryan and Ida M. Tarbell filling up a long evening with lectures that will deal with the greatest themes now before the world. It should be borne in mind that in order to make room for this great eveno'clock, dealing with the problems are planted to field beans.

Mrs. Wells of Petersburg Tells How.

Petersburg, Va. - "For two years my daughter suffered from a weakness

and pains in her right side; at times she was so had she could not do any work. For two years she was at-tended by the best physicianshere, and both agreed that physicianshere, and both agreed that she would have to be operated on. I suggested Lydia E-Pinkham's Vegeta-ble Compound, and

at first she refused to take it, but finally consented. From the very beginning it belped her, and now she is entirely well, and telling everybody how much good it has done her. —Mrs. W. D. Wells, 226 North Adams Street, Petersburg, Va.

If every girl who suffers as Miss Wells did, or from irregularities, painful periods, backache, sideache, dragging down pains, inflammation or ulceration would only give this famous root and herb remedy a trial they would soon find relief from such suffering.

For special advice women are asked to write the Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of forty years experience is at your service.

An Open Letter From Dr. Parker

The Dental Office using the E. R. Parker System, which has been established in this city, is the outgrowth of an idea that came to me over a quarter of a century ago.

I was a dentist, with only two hands, and my professional ability was limited to what those two hands could do.

I saw that I could do no more with those two hands in a dental way than Rockefeller could do with his two hands in an oil way.

And so I began to use my head.

It was as plain as the figure 1 that by training one man to extract teeth, another to fill teeth, another to make artificial teeth, and so on. and then associating these men in one office and having them work to-

DR. PARKER ounder and Executive Head of the E. R. Parker System

rether, there was no limit to what might be accomplished; almost no limit to the reasonable prices at which fine dentistry might be done.

It meant that materials and supplies could be bought in great quantities at wholesale, and the saving could be taken off the bills which the patient pays.

It meant that no time would be lost in operating, and a saving of time is always a saving

I carried out this idea in one office and it worked-worked better than I had ever hoped.

If one office was a success, why not two or ten or twenty or any number?

So I began establishing offices using the E. R. Parker System as fast as I could find competent dentists to conduct them, with the result that there is a Parker System office in this city.

This briefly describes the E. R. Parker System, based on the idea of lowering the price of dentistry by doing more of it and doing it better.

No charge is made for examinations of teeth, counsel or advice.

You are invited to visit this office, where you can see what modern dentistry has grown to be, and how little the price will be to have such work done as your teeth require.
