

# You Can Well Afford to Try Anything Once

And that is all we ask. TRY ONE LOAF of our Wonderful "Bake-Rite" bread and we have made a friend, and a customer for life.

IF we were making the ordinary kind of bread such as you can buy at every corner of the city, there would be no excuse for our coming here.

## But We Are Not Making Ordinary Bread

This is an entirely different proposition. Making a totally different loaf of bread, and making it under an entirely new process.

Here you can see every process of bread making and bread baking, and, in most cases it will be a revelation for you can see the flour just as it comes from the sack. See the process of mixing, raising, baking, wrapping and delivering right into the hands of the customer. DOING AWAY ENTIRELY with the old time basement bakery, with its unsanitary conditions and showing every process from start to finish.

This in itself is a drawing card but when you add to that the RESULTS WE OBTAIN through our SANITARY METHODS, our remarkable FORMULAS and our wonderful ELECTRIC BAKE-RITE OVEN, it is easy to see why we are meeting with such astonishing success in the establishment of our new institution.

Saturday's trade proved that you are interested and we regret exceedingly that we were unable to supply all who came to our store. In the future we will be able to supply the demand, no matter how great.

## ADD WATER

How does water get out of anything as tightly closed as a battery?

Because when the battery is working a little of the water is always turning into vapor, and some of the vapor escapes through the tiny vent holes in the plugs.

Be sure to put water in your battery every two weeks to make up for this loss. Never under any circumstances add acid.

Drive around and get a supply of distilled water. Ask us how to tell when there is enough water, and how to take a hydrometer test. Remind us to give you a copy of the booklet "Willard Service and You."
