strike at 2:30 o'clock this afternoon. It was said that he will investigate every angle of the shutdown and strike. The injunction, which failed to prevent the strike, is returnable in court tomorrow. Brotherhood leaders on whom it was served stated they will be on hand. The interboro company announced it would make no effort to move trains. General Manager Hedley said the tie-up was complete. Practically every policeman in New York was on duty today in the downtown districts. The early morning crowd was good humored in spite of the discomforts added by the rain. The

### SILVER FALLS CAMP DESTROYED

Silverton, Or., Aug. 18.—Forest fire in camp No. 2 on the Silver Falls Timber company property 20 miles east of here destroyed most of the buildings in the camp and put more than 200 men out of employment. The store buildings, boarding house and several homes were consumed, also practically all of the equipment for logging, including several large donkey engines. The men came out of camp Sunday night and there will be no more work in that camp for some little time. Camp B is still working but this is not sufficient to keep the mill in steady

### operation. The damage cannot be estimated at this time, but it is said to be heavy.

The Silver Falls Timber company have had the best season so far since the mill was built and for several months have been operating with two shifts. The mill will probably run only one shift now until the camp can be rebuilt.

### How Often Should Oil Be Changed In The Tractor

In order to get the best results from any tractor, the correct grade of lubricating oil must be used, and the crankcase must be drained at regular intervals. How often the lubricating oil should be changed cannot be absolutely determined, either from the standpoint of mileage or number of hours of running.

The board of lubricating engineers, which is maintained by the Standard Oil company to determine and recommend the correct grade of Zerolene for each type of engine, has given excellent advice on the subject of changing the oil in the crank case.

This board has shown that the frequency with which lubricating oil should be changed depends very largely upon the condition under which the tractor is operated. In other words, if there is little or practically no condensation of the fuel, the oil will consequently last a great deal longer. And if the oil is fed to the engine in such a way that a minimum amount is thrown upon the inside of the piston, there will be a minimum carbon deposit formed here, which means that the oil will run for a longer time without its lubricating value being impaired.

The operator of every tractor should frequently examine the condition of the lubricating oil in the crankcase, and when there is evidence of fuel or foreign matter in the lubricating oil, it should be drained out of the crankcase. The crankcase should be washed out very carefully with kerosene and especial care taken that no kerosene is left in the crankcase when the fresh supply of oil is put in. This should be done, whether the tractor was operated 10, 30 or 100 hours. Generally speaking, where a tractor has operated under favorable conditions, the oil should be changed every 30 or 40 hours. Where kerosene is used as a fuel, the lubricating oil should be changed daily, as there is considerably more condensation in the cylinders with kerosene than with distillate or gasoline.

It is a well known fact among engineers and manufacturers of tractors, that the operator who is particular in the care of the lubricating system and the oil very largely increases the economical operation of his tractor, and there is nothing in the operation of a tractor which will contribute so largely to net profits as lubricating care.

Mrs. Lawrence T. Harris, prominent club woman and social leader of Salem, has been appointed to serve on the Oregon committee of the Roosevelt Memorial association. The conference of the western division of the association opened in Portland this morning at the Benson hotel, about twenty delegates attending.

A country wide campaign for funds will start on October 27th, the anniversary of Colonel Roosevelt's death, Oregon's quota being \$97,000. The money will be used in erecting a monument in Washington, D. C., in memory of the late colonel and to buy if possible the Roosevelt estate at Oyster Bay. **Pershing To Leave Only 4,000 Yanks In France**

Paris, Aug. 18.—General Pershing is expected to return from Italy next Friday and will start for home September 1, leaving less than four thousand American soldiers in Europe. Pershing left for Italy Friday night.

German prisoners captured by American forces will be held until the peace treaty is ratified by congress.

It is understood that General Pershing will recommend a monument to the soldiers who fell at Beaumont, in memory of the hardest fighting Americans were called on for during the war. He is very proud of the A. K. F.'s work after an inspection of the battlefield and the Rhineland.

General Pershing, it is understood, hopes to visit his home town in Missouri and also Cheyenne, Wyo., immediately after reporting at Washington.
