Open Forum. THE WOMEN'S TURN Editor Capital Journal:--I cannot understand why they say the mothers, wives and sweethearts of each soldier "over there" must be learning and progressing as he is, and she must be able to hold him against all competition and must make herself and home attractive as possible when he comes home.

I never could understand why people have always preached that a woman must keep herself neat and cheerful and attractive for her husband. And I have seen numerous ideas for keeping a husband's love, and nothing said about a man keeping neat and cheerful and attractive for his wife. Oh no! the dear men must be looked up to and everything done, to please them. That subject is stale with age and I would like to see it turned the other side out, and the women given their chance.

Many women are in their graves because they tried to do more than they were able, in order to please a man, and what thanks or credit have these men ever given them for it? Yes, of course, most men want books, and music, in the home. Well, I think most women would be only too glad to have them and the only reason they do not is because the men wouldn't provide them. It is the man's place to provide all the needs in the home, as he usually has all the money. Many times a mother has poor health, too much to do, or too many children to bear and care for and keep neat and attractive, either herself, or husband should understand and sympathize, with her and do what they can to help, even if her "soldier boy" has gone through hardships, it hasn't been easy for his mother. What I have said about the soldier's mother, will apply to his wife, and if she has too many children, or too much work otherwise to do, he can ask himself if he isn't a great deal to blame for it and instead of blaming her and feeling that other women are more attractive than she, he had better set to work, making her happier and himself "worthier" of her love.

speculation means lower prices for the producer and higher prices for the consumer. By speculation, prices can be bought from the grower for from 9 to 10 cents a pound and placed on the retail shelf at 40 cents. You cannot speculate with bananas anymore. The United Fruit company would soon put a grower out of business if he tried. It is also difficult to speculate with California oranges. You cannot speculate with California raisins. But you can speculate with Oregon walnuts, prunes and other state products. Speculation cannot be controlled unless one has a controlling tonnage. By constantly having tonnage which we can place on the market, we can curb to a large extent, speculation. By knowing market conditions, by getting sources of information which give us a true knowledge of true values the Oregon Growers Cooperative association can get for the grower the highest prices.

After a few thousand brick and tile have been burned in a kiln, it is naturally too hot for two or three days for men to enter the kiln and begin the work of removing the products of the last firing. Considerable time is thus lost. As a matter of efficiency and to avoid to some extent this loss of time, the Portland Railway Light and Power company is today installing for the Salem Tile and Mercantile company, in the north part of the city, a large electric fan. The inside of a kiln is something like that of an ordinary bottle. After the burning, the brick and tile are cooled off by the natural current of air flowing from the bottom of the bottle shaped kiln, through the neck. Now by means of a large fan the circulation of air is made much more rapid and by means of this extra air it is thought that the brick will be cooled sooner, thereby saving on each burning, from 15 to 24 hours time. All of which is in the way of business efficiency.

POOL MEMBERS TO GET BIG PRICE FOR PEARS Record Figure Received By Fruit Union For No. 1 Pears In Big Sale.

Eighty five dollars a ton for No. 1 pears, and \$45 a ton for No. 2 pears is the price at which the Salem Fruit Union closed its pool yesterday. This means that members of the Salem Fruit Union will receive for their No. 1 pears as high a price as the members of the California Prune association, a figure never realized in past years.

While the members of the Salem Fruit Union pool will receive \$85 a ton, this will net them \$76, as the pool sold to the Roy Graves canneries at Woodburn and Sheridan and the Lafayette Canning company at Sheridan, delivered at these canneries.

This figure is the highest price at which pears have been sold in the north west this season. While the pool figure is \$85 a ton in Salem, the growers of pears in the Yamhill districts are receiving \$40 a ton from their Libby, McNeill & Libby contracts and the Medford growers have to be contented with from \$40 to \$55 a ton. With the exception of one or two small sales, the Roseburg growers all sold at \$65 a ton. The Monroe and Corvallis growers, through the aid of the Salem Fruit Union early in the season sold at \$75 a ton.

Last year the pool of the Salem Fruit Union was sold at \$48 a ton for No. 1 pears, while those outside of the pool received only \$40 a ton. The California association sold its entire crop of 14,000 tons at \$55 a ton, for No. 1 pears with \$50 a ton for No. 2. The Salem Fruit Union pool did not realize so much for No. 2 pears as there was more scrub than usual in the valley pears and the general quality was not up to the standard of No. 2.

Robert C. Paulus, manager of the Salem Fruit Union, said, in referring to the high price at which the pool was sold: "We got this usual price because of the fact that the Union was in touch with the market conditions and knew values, all due to our organization."

Mexican Government Says Cummings Not Expelled Mexico City, Aug. 20. (United Press)--Sensational reports that the British charge d'affaires, William D. Cummings had been expelled from Mexico, because he was persona non grata with the Mexican government were denied at the foreign office yesterday. The United Press correspondent was told that Carranza merely had notified the various departments of the government that Cummings had no official standing, because of the attitude of the British government in refusing to recognize the present Mexican administration. Carranza had ordered that Cummings should receive the same courtesies accorded any British subject, it was stated, but reports that any friction had occurred were denied.
