### CROPS ALONG COAST ARE NEARLY NORMAL

### Hops To Exceed Estimates While Prune Harvest Is Below Average.

San Francisco, Aug. 26.—(United Press.)—The twelfth federal reserve district's review of general business and agricultural conditions reports that the harvesting of grain has been practically completed in the southern part of the district's northern portion.

"Less damage to grain, on the whole, has resulted from the unfavorable conditions reported last month than was anticipated, although there are admit-

### HOW TO STOP BEING NERVOUS

Nothing Like Plain Bitro-Phosphate to Strengthen Weak Nerves and Increase Strength and Vigor

According to a noted French scientist, the most effective remedy for nervousness, insomnia and ailments due to depleted nerve force, is a form of organic phosphate known among druggists in this country as Bitro-Phosphate.

It is described as a substance which is similar in composition to the phosphorus naturally found in the brain and nerve cells and being easily and quickly assimilated, the work of creating nerve force, strength and vigor begins immediately it is taken into the human system.

There are many reports of astonishing results from its use, some showing remarkable improvement even in stubborn cases of long standing nerve weakness. As there are many kinds of phosphates, care should be exercised to procure the genuine Bitro-Phosphate.

toddy serious losses in Utah and the dry farm areas of southern Idaho," the review states. The following are excerpts:

"The estimated Pacific coast hop crop of 100,000 bales will be somewhat exceeded if the damage by lice, apparent in some sections of California, does not become more serious."

"In Oregon and Idaho, prunes are dropping badly, but the California crop will probably exceed previous estimates."

"A heavy crop of hay is being cut in Oregon and Washington, and a very light one in Utah. Further cuttings to parts of California, Idaho and Utah will be seriously curtailed by a shortage of irrigation water."

"Livestock throughout the district is reported in good to excellent condition, the market is fairly active under a lower range of prices, and the banks are reported to be able to extend the necessary credit to prevent the forcing of stock on the market. Figures are not yet available for this year's clip of wool but incomplete reports indicate a yield slightly in excess of 1918."

"The gathering of deciduous fruits, with the exception of pines and apples, is at its height throughout the entire district. Pears are of excellent quality but pines a little under normal, both as to size and quality. The apple crop shows a marked increase over that of 1918 and the quality is unusually good."

"There is a pressing demand for lumber, and mills are working under heavily increased costs of production. Prices have increased from \$4 to \$6 per thousand."

"Labor conditions on the whole are fairly settled in the district. A feeling of unrest is manifest in portions of western Washington only."

from six to eight weeks. Once a week place the brush in boiling water giving it a thorough scalding. You would not think of using the same table knife and fork day after day without cleansing. There is nothing dirtier put into the human mouth than a tooth brush used week after week without cleansing.

If you could see all surfaces of each tooth as you can see all surfaces of the fingers the cleaning of the teeth would be better done. But no amount of brushing will thoroughly clean the teeth, and your own inefficient efforts should be supplemented at least twice each year by a thorough cleansing at the hands of a competent dentist. The cost is nominal, and the investment will produce speedy and excellent returns.

### Strike Settlement Turned Down By Telephone Workers

San Francisco, Aug. 26.—High officials in the district council of electrical workers expressed "every confidence" today that the 15,000 telephone operators on the coast had voted to reject the compromise agreement that ended the recent coast-wide strike.

The vote is only partially counted.

If the vote is against the compromise officers, negotiations will be re-opened effected by the operators' international with the telephone companies for a higher wage scale.

Chicago.—"Ten bucks if you save my teeth. They're on the tenth floor," after which the bell boy performed a real service to a guest caught in a hotel fire.

### CLEANING THE TEETH.

(By Dr. E. R. Parker)

Use a liquid mouth wash, assisted by the tooth brush, once or twice a day, and also by rinsing the fluid vigorously in the mouth. It will reach into crevices and cavities of the teeth that a brush cannot. Be particular about the cleaning done just before retiring, as food debris left in the mouth over night is, especially injurious.

Do not use a tooth brush until the bristles are worn down to the handle. No brush should be used longer than

### INTERRED HUNS WHO ESCAPED ARE CAUGHT

### Eighteen Of Twenty Germans Returned To Camp Sherman Barracks.

Chillicothe, Ohio, Aug. 25.—Eighteen of the estimated twenty interned German sailors who escaped from the barracks at Sump Sherman, near here during a severe electrical storm were recaptured, authorities say.

The sailors crawled through a tunnel, running from the barracks cellar to a company street thirty feet away an official said. It was believed the men completed the tunnel some time, and only waited an auspicious time to use it.

Discovery of the wholesale escape followed almost immediately and soldiers and police from surrounding towns engaged in the hunt which yielded the 18 in groups of three to five. All were found in nearby towns.

The sailors were members of the crew of the German raider the Kronprinz, who have been interned here since 1915.

One prisoner said the tunnel was dug by thirty men, in one man shifts in six nights. The dirt was carried out by the pocket full. Six of the sailors were captured within the camp limits, five were found in Columbus, about 40 miles away, two were found in Chillicothe and five were taken from an electric car at Circleville, 20 miles from here.

### WHITE SOX LOOK LIKE AMERICAN WINNERS

### Gleason Tribe Expected To Meet Cincinnati Reds In World's Series.

New York, Aug. 26.—The White Sox now seem to be the choice of the American league for the championship set to with the Cincinnati Reds.

The Gleason tribe of white stockings ones are now on the front with a lead of six games over the Tigers. And they are going strong, having a run of ten straight victories before being set back yesterday by the Yankees.

Joe Jackson is mauling the pill again and his club means everything when it is working right. Collins, Weaver and Felch form a combination with him that is hard to beat. And as to pitching liams can go out every other day and bring a game back with them.

Jennings has a formidable club that must be reckoned with but the Tigers haven't been getting the breaks. Tris Speaker still maintains that his Indians have a look in for the honors. But it seems to be a very remote chance.

However, the big chance of the Cleveland club comes this week and next. The Tigers open a three game series at Cleveland today and then comes the White Sox for a trio starting August 29.

If the Indians take all six and get any help from the other clubs of the league, the series might be played in Ohio.

### ROUND COAST LEAGUE BASES

(By United Press.)

Owing to long jumps, two of them made still longer by the Los Angeles transportation strike, there will be no Coast league baseball today. Most of these postponed games will be played in double headers Saturday.

Vernon goes from Portland to Los Angeles, and the Angels from their home lot to Portland. The Onks come here from Seattle and the Bees journey to Rainierville from the bay region.

Curley Brown has again been eased out of Coast league pitching premier-ship, this time by Crandall also an Angel who has won 21 and lost 8.

### POTATO WASTE WILL BE SHOWN IN GOVERNMENT EXHIBIT DURING FAIR

How potatoes are wasted between farm and kitchen will be shown in a picture story from the bureau of markets, United States department of agriculture, in the government exhibits at the state fair. Beginning with a potato injured by a fork in digging, this panel shows how rot develops in the injury, and how such potatoes packed with others, or with potatoes that are diseased, result in immense quantities of tubers arriving at market unfit for food. Potatoes are wasted by careless handling, grading and packing, and this exhibit points out that such scenes as those showing cars of potatoes being thrown away at large market centers are all too common.

Another set of four pictures shows how many different kinds of hampers, round baskets, and market baskets are now in use for handling fruits and vegetables; also how this number could be cut down by standardizing on a few sizes which cover all the needs of shipper and dealer. The present large number of sizes of such containers results in confusion at markets and does not make for economical marketing of fruits and vegetables.

Another set of pictures illustrates how butter and syrups may be shipped by parcel post, and shows a basket of vegetables sent to the city on Saturday in time for Sunday dinner. A picture of sausage packed for shipment by parcel post is also shown.

**THE car with two or three or four different brands of tires reflects on the owner's ability to buy judiciously.**

**People who try Firestone Gray Sidewall Tires are no longer in the ranks of the tire doubters.**

**They know that at least one make of tires has more miles of wear. They know that the name Firestone carries assurance and that the tires are uniformly good.**

### UNITED STATES GOLFERS AT ST. ANDREWS-BY-THE-SEA

Charles (Chick) Evans Jr., Oswald Kirkby, D. E. Sawyer and Gardiner White, four noted United States golfers who recently toured eastern Canada for a week for the benefit of the Canadian Red Cross, all agree that one of the most beautiful links they saw was St. Andrews-by-the-Sea in New Brunswick. The scenic surroundings were not only most attractive, but the links themselves were a fine test of golf.

The fair greens were in excellent condition and the putting greens showed that they were under expert supervision. Many of the fair greens, walked in on one or more holes by majestic trees, overlook beautiful Passamaquoddy Bay, an arm of the Bay of Fundy, and the shores of Maine.

St. Andrews, not unworthily named in honor of golf's home club, St. Andrews, Scotland, is about 6000 yards in length, and par is 72. The amateur record, also 72, was made by the late Vernon Booth, who was killed while fighting for his country as an aviator in France. This record had never been equaled until the United States players, Evans and Kirkby, playing at the very top of their game on June 23, succeeded in doing so amid the applause of a large gallery. The professional record, 71, made by John Peacock who has had the links in charge for years, still awaits the attempt of some ambitious golfers to equal or lower it. Six holes are of 400 yards, or over, nine are 300 yards, or over, the longest is 500 yards and the shortest 125.

If the golfer who visits St. Andrews, wishes to take a day off from his favorite sport, he can turn to fishing, swimming, boating and tennis. There are first class hotel accommodations near the links.
