This Is Better Than Laxatives

One NR Tablet Each Night For A Week Will Correct Your Constipation and Make Constant Dosing Unnecessary. Try It.

Poor digestion and assimilation mean a poorly nourished body and low vitality. Poor circulation means clogged bowels, fermentation, putrefaction and the formation of poisonous gases which are absorbed by the blood and carried through the body. The result is weakness, headaches, dizziness, coated tongue, inactive liver, bilious attacks, loss of energy, nervousness, poor appetite, impoverished blood, sallow complexion, pimples, skin disease, and often times serious illness.

Ordinary laxatives, purges and cathartics—sulfate, oil, calomel and the like—may relieve for a few hours, but real, lasting benefit can only come through use of medicine that tones up and strengthens the digestive as well as the eliminative organs. Get a 25c box of Nature's Remedy (NR Tablets) and take one tablet each night for a week. Relief will follow the very first dose, but a few days will elapse before you feel and realize the fullest benefit. When you get straightened out and feel just right again you need not take medicine every day—an occasional NR Tablet will then keep your system in good condition and you will always feel your best. Remember, keeping well is easier and cheaper than getting well. Nature's Remedy (NR Tablets) are sold, guaranteed and recommended by your druggist.

DISQUE DROPS (Continued from page one)

ined it in July, 1910, according to information received.

The report recommends that the scheduled sale of spruce production equipment September 2 be deferred until Secretary Baker and the war department make a full investigation.

"It is believed from the foregoing facts, as set forth," concluded the report, "that approximately \$3,000,000 were squandered, misapplied and converted to the uses of the Milwaukee railroad interests. And such acts were permitted by men in positions of authority, whose duty it was to prevent such wasteful and unnecessary expenditures."

MAJORITY REPORT MADE FOR POLITICAL PURPOSE—LEA

Portland, Or., Aug. 29.—That the initial report to Secretary of War Baker by Congressman Frear and McGee, majority of the congressional sub-committee which is investigating spruce production in the northwest was erroneous is the declaration which was made here this afternoon by Representative Clarence F. Lea, third member of the probing committee.

Lea announced that he will a minority report by wire Saturday.

"Bunk," is the way he characterized that part of his colleagues' report which intimated that unless stopped on a salvage price of about 10 percent of true value could be secured from the \$20,000,000 sale of spruce production equipment, which is advertised to be held in Portland, September 2.

"Cunningly contrived for political effect," is another expression which was used by the democratic member of the committee in his comment upon the majority report.

DISQUE DECLARES RYAN HAD NO HAND IN BUILDING ROAD

Washington, Aug. 29.—John D. Ryan, former director of aircraft production, had nothing to do with building of an extension of the Chicago, St. Paul & Milwaukee railroad in which he is heavily interested, into spruce forests, according to former Brigadier General Disque, in a letter to Senator Thomas, Colorado. The letter was made public today following publication of a report by the Frear house investigating committee charging that Ryan had wasted money while developing spruce production in the Pacific northwest for building of aircraft.

"The Milwaukee railroad approached that stand of timber nearer than any other line and with a view to conserving the funds of the war department, I carried on negotiations with the officials of the Milwaukee railroad," Disque's letter said.

"When I referred to the extension of the Milwaukee road, Mr. Ryan promptly told me that he was a director of that line and would not discuss any matters pertaining to it. He asked Mr. Stettinius, assistant of war to act for him in every phase of the matter.

"I know positively that Mr. Ryan had absolutely nothing to do with the negotiations leading up to the contract. I carried them on myself and had a complete contract with them before I left Portland, requiring only the approval of the director of aircraft production to make it legal."

Great Yarmouth—Summoned to attend a patient late at night, a municipal doctor consulted a plan of his district, and found he lived half in and half out of the area. The patient's bed was exactly 27 feet from the borough boundary, and the doctor refused treatment. He was upheld.
