## The Brunswick

ALL PHONOGRAPHS IN ONE

Music lovers find their cherished ideal in the Brunswick Phonograph. By the Brunswick Method of Reproduction music is given its truest and finest tone. The soft, mellow, non-metallic tone stands in clear contrast to the shrill, sharp tones of other makes of Phonographs. The voice of the singer is clear, distinct and natural. The Brunswick Method of reproducing comprises two scientific features—the Ultona and the Tone Amplifier.

The Ultona plays all records truer, finer and sweeter. It is not a makeshift contrivance but involves a genuine principle of sound. A slight turn of the hand presents the right needle, diaphragm and weight for playing any record. The Tone Amplifier is different from all others, made entirely of wood and shaped so as to avoid angles and vibration. Hence no echo or foreign sound is developed in the cabinet. Suppose you hear the Brunswick play today.
