BLOSHOPS FABRICS

Get Them Quick

They are at BISHOPS

for your inspection a new assortment of the latest in ARROW COLLARS, there are some new additions to the already popular line, that we are sure will please you.

Extra value in Defense Work Shirts.

We have decided to hit the shirt market a swat for you, in doing so we purchased an exceptional garment, it is different from all others. This garment has 72 threads to the inch—the average shirt has only 48 to 60. This makes a very much heavier shirt.

This material used in this garment is the best made. Regardless of the washing, it always launder soft, both to the hands of the woman laundering it and to the wearer.

It is made from "SIGNAL CAMBRIA" this garment is full 60 inches in length and over four inches longer than other garments. We purchased this garment in lots of 100 DOZEN and over we can sell this shirt at a very moderate price, the price that you pay for a much more inferior garment.

You should get the best. It costs no more—LESS at the end of the year.
